

CLEVELAND CLINIC JOURNAL OF MEDICINE

HIGHLIGHTS FROM MEDICAL GRAND ROUNDS

■ WILLIAM S. WILKE, EDITOR

Tales of a Gypsy doc: perspectives on social and medical aspects of care of the American Gypsy population 427

Understanding a patient's culture and outlook is critical to any doctor-patient interaction, but perhaps especially so when dealing with the Gypsy population.

J. D. THOMAS

Endocrine causes of impotence 428

Since 5% to 10% of impotence cases may have an endocrine component, the workup for impotence should consider endocrine disorders, which can be diagnosed readily with laboratory tests and, in the majority of patients, can be cured.

C. FAIMAN

REVIEWS

Management of variceal bleeding in the 1990s 431

Therapeutic options now include pharmacologic reduction of portal hypertension, endoscopic obliteration of varices, placement of decompressive shunts, and liver transplantation.

J. M. HENDERSON, W. D. CAREY, D. P. VOGT, AND OTHERS

Recurrence, remission, and relapse of seizures 439

Drug treatment after a first seizure reduces the risk of recurrence by about half, but many patients find the adverse effects intolerable.

N. K. SO

CARDIOLOGY PERSPECTIVE

Breaking the thrombolytic gridlock: insights from the GUSTO trial 445

The GUSTO chairman reflects on the study's contributions to the current understanding of how to treat acute myocardial infarction.

E. J. TOPOL

ORIGINAL STUDIES

Mortality of patients transferred to a tertiary care hospital 449

A look at the effect of transfers on patient outcome and on hospital mortality statistics, and how superficial review of these statistics could lead to mistaken conclusions about the quality of hospitals to which patients are transferred.

J. D. CLOUGH, R. KAY, W. R. GOMBESKI JR AND OTHERS

Continued on p. 425

TABLE OF CONTENTS

Continued from p. 423

Early-onset prosthetic valve endocarditis 455

Despite advances in surgical expertise and antibiotic prophylaxis, this complication occurs in about 1% of patients with implanted heart valves, with a mortality of 30% to 50%.

T. F. KEYS

Systemic diseases associated with intermediate uveitis 460

Multiple sclerosis, inflammatory bowel disease, thyroid abnormalities, and possible Epstein-Barr virus infection were among the findings in 26 of 83 intermediate uveitis patients.

S. A. BOSKOVICH, C. Y. LOWDER, D. M. MEISLER, AND OTHERS

CURRENT DRUG THERAPY

■ DONALD G. VIDT AND ALAN BAKST, EDITORS

Hepatic toxicity of antirheumatic drugs 466

Drug treatment of rheumatic diseases carries a small but well-documented risk of liver toxicity. This study identifies clinical syndromes associated with liver injury in these patients.

E. P. BRASS

CASE REPORTS

Associated ulcerative colitis, sclerosing cholangitis, and insulin-dependent diabetes mellitus 473

M. KAY, R. WYLLIE, W. MICHENER, AND OTHERS

Acute noncardiogenic pulmonary edema due to polymer fume fever 479

M. J. SILVER AND D. K. YOUNG

CME DIGEST

Which patients need aggressive lipid-altering therapy? 483

D. B. HUNNINGHAKE

Rheumatic manifestations of HIV infection 484
