## INTERPRETING KEY TRIALS.....

**GUSTO V: Combination drug treatment of acute myocardial infarction** 554

The combination of abciximab in full doses and reteplase in half doses was not superior to full-dose reteplase alone, but it was "not inferior" either.

A.T. ASKARI AND A.M. LINCOFF

## COMMENTARY.....

**GUSTO V: Should it affect clinical practice?** 520

The results of GUSTO V were equivocal and should not lead physicians to change how they treat myocardial infarction.

J.L. ORFORD AND P.B. BERGER

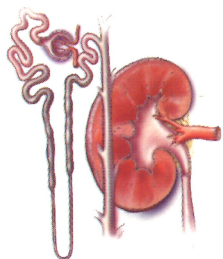

## CURRENT DRUG THERAPY.....

**Aromatase inhibitors in breast cancer: Current and evolving roles** 561

Aromatase inhibitors are finding new uses. Already established for treating metastatic breast cancer in postmenopausal women, they are gaining acceptance as adjuvant treatment as well.

J. HILL AND H. MOORE

## MEDICAL GRAND ROUNDS.....

**Acute renal failure in hospitalized patients** 569

Acute renal failure demands a logical approach to its prevention and early diagnosis.
