

Table of Contents*

■ HISTORICAL PERSPECTIVES: NEUROINTENSIVE CARE

- The development of neurologic intensive care**S4
Allan H. Ropper, MD, *St. Elizabeth's Medical Center and Tufts University School of Medicine, Boston, Mass.*

■ INTRACRANIAL PRESSURE

- The pathophysiology of brain edema and elevated intracranial pressure**S6
Anthony Marmarou, PhD, *Virginia Commonwealth University Medical Center, Richmond, Va.*
- Hypertonic saline for cerebral edema and elevated intracranial pressure**S9
José I. Suarez, MD, *University Hospitals of Cleveland and Case Western Reserve University, Cleveland, Ohio*
- Every breath you take: Hyperventilation and intracranial pressure**S14
Claudia Robertson, MD, *Baylor College of Medicine, Houston, Tex.*
- Multimodal monitoring in neurocritical care**S16
Michael A. De Georgia, MD, *The Cleveland Clinic Foundation, Cleveland, Ohio*

■ HEMORRHAGIC STROKE

- Endovascular coiling: The end of conventional neurosurgery?**S18
Peter A. Rasmussen, MD, *The Cleveland Clinic Foundation, Cleveland, Ohio*

■ FUNDAMENTALS OF CRITICAL CARE

- Lessons from the medical and surgical ICU**S19
J. Javier Provencio, MD, *The Cleveland Clinic Foundation, Cleveland, Ohio*

■ HISTORICAL PERSPECTIVES: CEREBROVASCULAR DISEASE

- Cerebrovascular disease: Historical background, with an eye to the future**S22
Louis R. Caplan, MD, *Harvard Medical School and Beth Israel Deaconess Medical Center, Boston, Mass.*

■ ACUTE ISCHEMIC STROKE

- Pathophysiology of acute ischemic stroke**S25
Midori A. Yenari, MD, *Stanford University, Stanford, Calif.*
- Intravenous thrombolysis for acute stroke**S28
Joseph P. Broderick, MD, *University of Cincinnati College of Medicine, Cincinnati, Ohio*
- Intra-arterial thrombolysis for acute stroke**S31
Anthony Furlan, MD, *The Cleveland Clinic Foundation, Cleveland, Ohio*
- Therapeutic hypothermia may enhance reperfusion in acute ischemic stroke**S39
Derk W. Krieger, MD, PhD, *The Cleveland Clinic Foundation, Cleveland, Ohio*
- Stem cell transplantation for stroke**S40
Lawrence R. Wechsler, MD, *University of Pittsburgh Medical School*

The *Cleveland Clinic Journal of Medicine* (ISSN 0891-1150) is published 12 times yearly by The Cleveland Clinic Foundation.

Subscription rates: U.S. and possessions: personal \$98; institutional \$124; single copy/back issue \$16. Foreign: \$124; single copy/back issue \$16. Institutional (mul-

tiple-reader rate) applies to libraries, schools, hospitals, and federal, commercial, and private institutions and organizations. Individual subscriptions must be in the names of, billed to, and paid by individuals.

Postmaster address changes: *Cleveland Clinic Journal of Medicine*, NA32, 9500 Euclid Avenue, Cleveland, OH 44195. Subscription orders, editorial, reprint, and production offices (same address): (216) 444-2661 (phone); (216) 444-9385 (fax); ccjm@ccf.org (e-mail); www.ccjm.org (Web).

Printed in USA.

■ EXTRACRANIAL DISEASE

Carotid artery disease: From knife to stentS42
 Marc R. Mayberg, MD, *The Cleveland Clinic Foundation, Cleveland, Ohio*

Carotid stenting in high-risk patients: Design and rationale of the SAPHIRE trialS45
 Jay S. Yadav, MD, *The Cleveland Clinic Foundation, Cleveland, Ohio*

■ INTRACRANIAL DISEASE

Medical management of intracranial atherosclerosis: Current state of the artS47
 Cathy A. Sila, MD, *The Cleveland Clinic Foundation, Cleveland, Ohio*

Intracranial stenting: Which patients and when?S50
 Randall T. Higashida, MD, *University of California, San Francisco, Medical Center*

■ ANTITHROMBOTIC THERAPY

Anticoagulation for stroke prevention: Yes, no, maybeS52
 J.P. Mohr, MD, *The Neurological Institute, New York, N.Y.*

Antiplatelet therapy for acute stroke: Aspirin and beyondS57
 Cathy A. Sila, MD, *The Cleveland Clinic Foundation, Cleveland, Ohio*

Abstracts/Poster PresentationsS60

1. Hyponatremia-related focal cerebral edema, a mimic of worsening cerebral edema due to intracerebral hemorrhage—*P. Widdess-Walsh, V. Sabharwal*
2. Suboccipital craniectomy for acute cerebellar ischemic stroke—*B.R. Cohen, G.L. Bernardini, D. Friedlich, A.J. Popp*
3. The feasibility and safety of mild brain hypothermia obtained by local surface cooling in acute stroke—*K. Yamada, H. Moriwaki, H. Oe, K. Miyashita, K. Nagatsuka, T. Yamawaki, H. Naritomi*
4. The Diverter, a novel permanent arterial diversion device—*J. Leor, Y. Grad, O. Oz, Y. Assaf*
5. Fatal arrhythmia in an anxious patient during recovery from lateral medullary infarction—*J.G. Lattore*
6. Motor, behavioral, and cognitive changes in patients with thalamic lesions—*A.V. Srinivasan, B.S. Virudhagirinathan, C.U. Velmurugendran*
7. Reversal of locked-in syndrome with anticoagulation, induced hypertension, and intravenous t-PA—*K.E. Wartenberg, N.S. Janjua, S.A. Mayer, P. Meyers*
8. Dantrolene reduces the threshold and gain for shivering—*R. Lenhardt*
9. Predicting outcome after subarachnoid hemorrhage: Comparison of different grading systems—*M. Berker, A. Deogaonkar, V. Sabharwal, P. Rasmussen, M. Mayberg, M. DeGeorgia*
10. Integrative monitoring methods in neurocritical care—*A. Deogaonkar, A. Vander Kouwe, K. Homing, R. Burgess, M. DeGeorgia*

* In addition to the presentations represented here, The Cleveland Clinic's Neurocritical Care 2003 Summit also included the following talks, which were not accompanied by written syllabus submissions for publication:

- **Impact of vascular disease on world health care**—*Marc Mayberg, MD* (Introductory Presentation)
- **Blood pressure: Do we raise it or lower it? CPP protocol vs Lund protocol**—*Randall Chestnut, MD* (Intracranial Pressure)
- **Decompressive craniectomy: Back to the future**—*Jeffrey Frank, MD* (Intracranial Pressure)
- **Subarachnoid hemorrhage: From clip to coil**—*Neil Martin, MD* (Hemorrhagic Stroke)
- **Cerebral vasospasm: Which H is the most important H?**—*Stephan Mayer, MD* (Hemorrhagic Stroke)
- **Intracerebral hemorrhage: To evacuate or not to evacuate**—*A.D. Mendelow, MB, Bch, PhD* (Hemorrhagic Stroke)
- **Lessons learned from head trauma**—*M. Ross Bullock, MD* (Fundamentals of Critical Care)
- **The future of neurocritical care**—*Michael Diringier, MD* (Fundamentals of Critical Care)
- **Neuroimaging of acute stroke**—*Thomas Masaryk, MD* (Acute Ischemic Stroke)
- **Cardiac sources of embolism**—*Pierre Amarenco, MD* (Acute Ischemic Stroke)
- **Beyond thrombolysis: Combination therapy and other strategies for reperfusion**—*Thomas Brott, MD* (Acute Ischemic Stroke)
- **The future of cerebrovascular disease**—*Werner Hacke, MD* (Antithrombotic Therapy)
