

TABLE OF CONTENTS

FROM THE EDITOR

The angiotensin story continues: ARBs in heart failure 606

Considering the gravity of the problem of heart failure, it makes sense to have as many alternative pathways to success as we can find.

J.D. CLOUGH

COMMENTARY

It's what's inside the white coat that counts 607

Welcoming the first class of the Cleveland Clinic Lerner College of Medicine of Case Western Reserve University.

P.M. HALL

INTERPRETING KEY TRIALS

Lessons from the PROVE-IT trial. Higher dose of potent statin better for high-risk patients 609

Patients with acute coronary syndromes should receive aggressive lipid-lowering therapy with a statin in high doses. Goal low-density lipoprotein levels may need to be lower.

K.K. KHUSH AND D. WATERS

CANCER DIAGNOSIS AND MANAGEMENT

Cancer pain: How to measure the fifth vital sign 625

To control pain effectively in cancer patients, we must assess it regularly and consistently.

M.P. DAVIS AND D. WALSH

REVIEW

Acute leukemia with a very high leukocyte count: Confronting a medical emergency 633

From 5% to 30% of adult patients with acute leukemias present with hyperleukocytosis and leukostasis. Prompt action is needed.

N.S. MAJHAIL AND A.E. LICHTIN

REVIEW

Evaluation of hyponatremia: A little physiology goes a long way 639

A careful and logical approach can promptly reveal the causative factor or factors in nearly all cases.

B.J. FREDA, M.B. DAVIDSON, AND P.M. HALL

IM BOARD REVIEW

A 76-year-old woman with erratic anticoagulation 651

A patient previously controlled on warfarin now has bleeding and an INR of 7. What has changed?

E.P. LESH, L. SAULLO, AND S. UDVARI-NAGI

REVIEW

Nonalcoholic fatty liver disease and the epidemic of obesity 657

Nonalcoholic fatty liver disease, unknown only 2 decades ago, is now ubiquitous, especially among the obese.

R. COLLANTES, J.P. ONG, AND Z.M. YOUNOSSE

INTERPRETING KEY TRIALS

Angiotensin-receptor blockers in heart failure: Evidence from the CHARM trial 665

The ARB candesartan was not only a good alternative to an ACE inhibitor, it was beneficial when added to a regimen that already included an ACE inhibitor and a beta-blocker.

S. BHAKTA AND M.E. DUNLAP

EDITORIAL

And an ARB makes nine: Polypharmacy in patients with heart failure 674

Based on strong evidence, a patient with advanced ischemic cardiomyopathy should be taking nine medications. But it is difficult not to worry about polypharmacy.

J. STEHLIK AND D.O. TAYLOR

PATIENT-ORIENTED EVIDENCE THAT MATTERS (POEMs)

- Carotid endarterectomy prevents stroke in asymptomatic patients 618
- Hypertension follow-up every 6 months is as good as every 3 months 619
- Limited data on benefits of dietary supplements for weight loss 623
- Open hernia repair better than laparoscopic 624
