FROM THE EDITOR.....

Oil it where it squeaks: Evidence, experience, and osteoarthritis therapy 880

B. F. MANDELL

1-MINUTE CONSULT.....

When can patients with acute deep vein thrombosis be allowed to get up and walk? 893

They should ambulate as tolerated. Bed rest is not evidence-based and may be harmful.

L. S. FELDMAN AND D. J. BROTMAN

REVIEW.....

Intra-articular injections for osteoarthritis of the knee 897

D. H. NEUSTADT

REVIEW.....

Recurrent pregnancy loss: Evaluation and discussion of the causes and their management 913

Women who miscarry two or more consecutive pregnancies deserve an evaluation to look for the cause, which sometimes can be treated.

R. KIWI

REVIEW.....

CURRENT DRUG THERAPY

Using the new HPV vaccines in clinical practice 929

The new vaccines against human papillomavirus (HPV) could prevent up to 70% of cases of cervical cancer. But Pap testing will still be necessary.

Interpreting the ASTEROID trial. Coronary atherosclerosis can regress with very intensive statin therapy 937

The optimal strategy for lipid-lowering in patients with coronary artery disease may be to aim for the lowest low-density lipoprotein cholesterol level that can be attained without adverse effects.
