

TABLE OF CONTENTS

FROM THE EDITOR.....

The surgical unsupersizing of America 960

For years, "fat surgery" was viewed with skepticism by many internists. The tide is turning, but there is still no free lunch.

B. F. MANDELL

EDITORIAL.....

Health care worker, vaccinate thyself: Toward better compliance with influenza vaccination 965

At our hospital, workers can decline to be vaccinated, but everyone must go to our Web site and be counted.

S. M. GORDON

EDITORIAL.....

Bariatric surgery: Part of the answer to the obesity epidemic 969

Bariatric surgery is not the total answer to obesity, but it can be an integral part of a comprehensive weight-management program.

W. T. CEFALU

CURRENT DRUG THERAPY.....

The controversy over long-acting beta agonists: Examining the evidence 973

Asthma drugs that contain salmeterol (Serevent, Advair) or formoterol (Foradil) now carry a warning about an increased risk of asthma-related death. This paper critically examines the evidence.

D. M. LANG

REVIEW.....

Risks and benefits of bariatric surgery: Current evidence 993

The risks are not trivial, but they are acceptably low. The benefits: patients lose weight and keep it off, and many are cured of obesity-related diseases, notably type 2 diabetes.

S. A. BRETHAUER, B. CHAND, AND P. R. SCHAUER

Bariatric surgery: Is it right for you? 1008

REVIEW

Improving influenza vaccination rates among adults 1009

The medical profession must and can do a better job of vaccinating people against influenza every year. All we need is a plan.

K.L. NICHOL

1-MINUTE CONSULT

Which agents should we use to treat and prevent influenza in 2006–2007? 1016

Oseltamivir (Tamiflu) and zanamivir (Relenza) are the treatments of choice this year, but vaccination remains the primary preventive measure.

S.B. MOSSAD

MEDICAL GRAND ROUNDS

Endocrinology update 2006 1019

Recent studies have shed light on diabetes management, the therapeutic range of thyroid hormones, the possible role of thyroxine in cancer, and the possible role of vitamin D in preventing type 1 diabetes.

S.S.K. REDDY

REVIEW

Does this patient have primary progressive aphasia? 1025

Primary progressive aphasia is a distinct clinical entity in which the patient develops language deficits while other cognitive domains remain relatively preserved until late in the illness.

S.J. KANTER, R.M. FACTORA, AND T.T. SUH

THE CLINICAL PICTURE

A 48-year-old man with acute, 'knife-like' rectal pain 1028

He has lost 90 pounds in the last 9 months and has had white oral plaques, chronic diarrhea, low-grade fever, and anorexia. What is the most likely diagnosis?

D.Z. ROSE, N. KEDIA, J.T. JACOB, AND J. WALTON TOMFORD

PATIENT-ORIENTED INFORMATION THAT MATTERS (POEMs)

■ Antibiotics are slightly effective for purulent rhinitis 961

■ MRSA is common in abscessed skin infections 968

DEPARTMENTS

CME Calendar 967

Instructions to Authors 1030

CME Self-test Online 1031

■ The *Cleveland Clinic Journal of Medicine* is peer-reviewed and indexed in *Index Medicus*.

UPCOMING FEATURES

- PET and PET/CT scanning:
Uses in oncology, cardiology, neurology
- Understanding the resurgence of mumps
- What does antiplatelet resistance mean to the clinician?
- Do not mistake bipolar for unipolar depression
- Antiaging therapies:
High hopes, little evidence
- Do dietary fructose and elevated uric acid cause coronary disease?
- Obstructive sleep apnea is linked to multiple diseases
