PROCEEDINGS OF THE HEART-BRAIN SUMMIT

JUNE 15-17, 2006

Hosted by the Earl and Doris Bakken Heart-Brain Institute at Cleveland Clinic

Supplement 1 to Volume 74, February 2007

Supplement Editor

MARC S. PENN, MD, PHD Director, Earl and Doris Bakken Heart-Brain Institute Cleveland Clinic JAMES B. YOUNG, MD Chairman, Division of Medicine Cleveland Clinic JOSEPH F. HAHN, MD Chief of Staff Cleveland Clinic

Course Directors

Introduction: Heart-brain medicine: Where we go from here and why	
Opening remarks: The dream behind the summit	
Keynote address: 'Voodoo' death revisited: The modern lessons of neurocardiology	
The broken heart syndrome	
Brain imaging in cardiovascular disease: State of the art	
Cortical control of the heart	
Neurological mechanisms of chest pain and cardiac disease	
Hypertension in sleep apnea: The role of the sympathetic pathway

Avenue, Cleveland, OH 44195. Subscription orders, editorial, reprint, and production offices (same address): (216) 444-2661 (phone); (216) 444-9385 (fax); The Cleveland Clinic Journal of Medicine (ISSN 0891-1150) is published 12 times yearly ccjm@ccf.org (e-mail); www.ccjm.org (Web). by the Cleveland Clinic Foundation. AMP Subscription rates: U.S. and possessions: personal \$108; institutional \$134; single Printed in USA.

CLEVELAND CLINIC JOURNAL OF MEDICINE

CINE VOLUME 74 • SUPPLEMENT 1

S1

FEBRUARY 2007

Inflammation: Implications for understanding the heart-brain connection
The anti-ischemic effects of electrical neurostimulation in the heart
The little brain on the heart
Open heart surgery and cognitive decline
The heart and the brain within the broader context of wellness
The heart-brain interaction during emotionally provoked myocardial ischemia: Implications of cortical hyperactivation in CAD and gender interactions Robert Soufer, MD, Yale University, New Haven, Connecticut; and Matthew M. Burg, PhD, Yale University, New Haven, Connecticut, and Columbia University, New York, New York
Depression and heart disease
Sick at heart: The pathophysiology of negative emotions
Role of the brain in ventricular fibrillation and hypertension: From animal models to early human studies
New paradigms in heart-brain medicine: Nonlinear physiology, state-dependent proteomics
Subarachnoid hemorrhage: A model for heart-brain interactions
Cardiac denervation in patients with Parkinson disease
Aging and the brain renin-angiotensin system: Insights from studies in transgenic rats
Contextual cardiology: What modern medicine can learn from ancient Hawaiian wisdom
Cardiocerebral resuscitation: The optimal approach to cardiac arrest

 \overline{z}

S2 CLEVELAND CLINIC JOURNAL OF MEDICINE VOLUME 74 • SUPPLEMENT 1 FEBRUARY 2007

CONTENTS

Heart transplantation: A magnified model of heart-brain interactions
Patent foramen ovale and migraine
Patent foramen ovale and stroke: To close or not to close?
Sudden unexplained death in epilepsy: The role of the heart
Hydrocephalus and the heart: Interactions of the first and third circulations
Cognitive impairment in chronic heart failure
Cardiac events and brain injury: Ethical implications

Articles in these proceedings were either submitted as manuscripts by the Summit faculty or developed by the *Cleveland Clinic Journal of Medicine* staff from transcripts of audiotaped Summit presentations and then reviewed and revised by the Summit faculty.
