

CLEVELAND CLINIC JOURNAL OF MEDICINE

HIGHLIGHTS FROM MEDICAL GRAND ROUNDS

WILLIAM S. WILKE, MD, EDITOR

Chronic fatigue and immune dysfunction 123

Recent advances in the understanding of the syndrome of chronic fatigue and immune dysfunction facilitate diagnosis and treatment of specific subsets of patients.

LEONARD H. CALABRESE, DO
THERESA DANAQ, MD
ENRICO G. CAMARA, MD
AND WILLIAM S. WILKE, MD

Assessing new techniques in coronary angioplasty 124

A cardiologist describes how two new techniques were integrated into everyday practice.

DONALD S. BAIM, MD

CME NOTEBOOK

CLINICAL NEPHROLOGY UPDATE

Dialysis-related peritonitis rates declining 141

MARTIN J. SCHREIBER, MD

Treating hypomagnesemia 141

ZALMAN S. AGUS, MD

Lactic acidosis: causes and treatments 141

LAURENCE B. GARDNER, MD

The challenges of HIV nephropathy 142

GERALD B. APPEL, MD

Kidney stones: have the indications for surgery changed? 142

STEVAN B. STREEM, MD

REVIEWS

Sleep in the patient with lung disease 157

How to recognize and manage the ill effects that sleep-related respiratory changes can have on underlying lung disease, including COPD, asthma, and interstitial lung disease.

DAVID P. MEEKER, MD

Survivors of sudden cardiac death: a rational approach to evaluation and therapy of patients surviving ventricular fibrillation 166

A strategy for identifying underlying disease, stratifying the risk of recurrence, and formulating specific therapy in these patients, at high risk for life-threatening ventricular tachyarrhythmias.

ARTHUR J. RABINOWITZ, MD
AND JAMES D. MALONEY, MD

Continued on page 118

Continued from page 114

Indications for electrophysiologic study in patients with ventricular arrhythmias 175

An analysis of current guidelines for the use of electrophysiologic study, and a look at practical applications.

SERGIO L. PINSKI, MD
AND JAMES D. MALONEY, MD

The phenomenal growth of laparoscopic cholecystectomy: a review 186

Touted by surgeons who perform it and demanded by a public attracted by claims of reduced pain and fast recovery, laparoscopic cholecystectomy is taking the United States by storm. The authors provide insight into the appropriate use of this operation.

RAPHAEL S. CHUNG, MD
AND THOMAS A. BROUGHAN, MD

CURRENT DRUG THERAPY

DONALD G. VIDT, MD, AND ALAN BAKST, PharmD, EDITORS

The hemodynamic effects of adrenergic blocking agents 193

Alpha-1 blockers may suit patients with active life-styles, peripheral vascular disorders, or high blood-cholesterol levels, while beta blockers are useful in tachycardia, palpitations, or angina pectoris. An overview of the pharmacologic qualities and numerous clinical applications of these agents.

PROFESSOR PER LUND-JOHANSEN

CASE REPORTS

Catheter ablation for recurrent ventricular tachycardia 203

Successful use of this procedure is described in a 78-year-old man with drug-refractory ventricular tachycardia who had both an implantable cardioverter-defibrillator and an antitachycardia pacemaker.

RONALD McCOWAN, MD
BRUCE L. WILKOFF, MD
HUGH McALISTER, MB, ChB
AND TONY W. SIMMONS, MD

Annular pancreas and intermittent duodenal obstruction in an alcoholic adult 208

This congenital condition, in which pancreatic tissue encircles the middle portion of the duodenum, may not cause symptoms until adulthood, as was the case in this 49-year-old man.

JAMES C. SPERRAZZA, BS
RICHARD A. FLANAGAN, Jr, MD
AND MARK R. KATLIC, MD

RADIOLOGY PATHOLOGY GRAND ROUNDS

MOULAY A. MEZIANE, MD, EDITOR

Mental status changes in an immunocompromised patient 211

A young patient with Burkitt's lymphoma and acute lymphoblastic leukemia was found unarousable following 3 days of forgetfulness and expressive nominal aphasia.

CATHRYN POWERS, MD
MARK GLICKLICH, MD
AND KATHLEEN GLEASON BEAVIS, MD

EDITORIAL

Endocarditis prophylaxis: the new guidelines 216

PHILLIP I. LERNER, MD
