EDITORIAL

Chronic disease management and managed care: specialists have an important role 67

In its current incarnation, managed care has a major flaw: it fails to address the health care needs of people with chronic disease.

J.D. CLOUGH
Editor-in-Chief

MEDICAL GRAND ROUNDS

Gastric and intestinal dysmotility syndromes 69

Disorders of motility of the stomach and small intestine are quite common, and patients often present with a variety of nonspecific symptoms.

E.E. SOFFER

CANCER DIAGNOSIS AND MANAGEMENT

The dilemma of evaluating and treating cancer of unknown primary site 73

In 5% to 10% of cancer cases, the initial presentation reflects metastases and not the primary lesion. How aggressively should one search for the tumor site?

M. MARKMAN

CLINICAL REVIEWS

Managing latex allergy in patients and health care workers 76

Latex products we use every day may cause serious problems for patients and coworkers. Health care providers must develop a plan for protecting allergic patients and staff from latex exposure.

A.L. MELTON

Evaluation and medical management of female urinary incontinence 83

Urinary incontinence should not be accepted as inevitable. Primary care clinicians should take an active role in treatment.

R.R. RACKLEY AND R.A. APPELL

Clinical implications of the interaction between hypothyroidism and the cardiovascular system 93

Hypothyroidism frequently causes cardiovascular manifestations that can complicate treatment of both the hypothyroidism and any underlying cardiovascular disease.

CURRENT DRUG THERAPY

The role of azole antifungal agents for systemic antifungal therapy 99

The azoles have not supplanted amphotericin B for managing most serious fungal infections, but they offer alternatives in a variety of unique situations.
