CLEVELAND CLINIC JOURNAL OF MEDICINE

DEDICATED TO LIFELONG LEARNING

MEDICAL GRAND ROUNDS

Detecting and managing subclinical hyperthyroidism 65

With physicians using TSH assays more often, they are encountering subclinical thyroid disease more frequently.

H.S. SAADI

Understanding culture clashes in the clinical setting 66

Although conflict between people is common, some conflicts are the result of different cultural assumptions. These disagreements can complicate good communication between physician and patient.

J. SLOMKA

HEALTH CARE REFORM UPDATE

Health care reform 1998: A resurging debate 73

This is an election year, so 1998 will be filled with intense debates about expanding Medicare eligibility, regulating managed care, and eliminating health care fraud.

D.E. NICKELSON

INTERPRETING KEY TRIALS

Angioplasty or fibrinolysis for acute MI: The GUSTO IIb study 75

Primary angioplasty is better than fibrinolytic therapy in acute myocardial infarction, but the advantage is not as large as we once thought.

S.J. BRENER

INTERNAL MEDICINE BOARD REVIEW

Two patients with neuroglycopenia 82

One patient suffers from periodic "silliness," the other suffers from syncope. What is the diagnosis and treatment?

A.M. DIZON, R. DANESE, AND B.J. HOOGWERF

REVIEWS

An overview of immune hemolytic anemias 89

Often patients with these anemias present with symptoms that are common in anemia of any cause. A full-color illustration shows the different processes of red blood cell destruction.

R.E. DOMEN

REVIEWS

New hope for impaired physicians: Helping the physician while protecting patients 101

The medical profession has greater awareness of the problem of substance abuse among physicians, and has set up programs to confront impaired physicians about their problem so they can overcome their resistance to treatment.

G.B. COLLINS

CANCER DIAGNOSIS AND MANAGEMENT

Cancer and the mind: Separating fact from fiction 107

It is quite appropriate for physicians to encourage cancer patients to join support groups. However, these patients should not blame themselves or their emotions for causing the cancer.
