TABLE OF CONTENTS

MEDICAL GRAND ROUNDS

Primary biliary cirrhosis: Ursodiol effective, but think transplantation sooner 174

Ursodiol may slow the progression of primary biliary cirrhosis, but treatment is still mainly palliative, and liver transplantation is the only definitive therapy.

R.L. CARITHERS

Diagnosing Marfan syndrome is still based on clinical characteristics 176

Despite new genetic findings, the best way to diagnose Marfan syndrome is still the classic clinical findings.

D.S. MOODIE

REVIEWS

Thrombolysis for acute ischemic stroke: Update on the beginning of a revolution 185

With t-PA used to treat ischemic stroke, acute stroke is a medical emergency similar to a myocardial infarction.

A.J. FURLAN

Agitated dementia: Drug vs nondrug treatment 191

An individualized approach to identify and treat the cause of the agitation is more effective than simply prescribing neuroleptic drugs.

L. POZUELO, K. FRANCO, AND R.L. PALMER

Oxygen and aerosolized drug delivery: Matching the device to the patient 200

The many devices for administering supplemental oxygen and aerosolized drugs allow physicians to individualize therapy, but choosing the right device presents challenges. With color illustrations showing how each device operates.

J.E. BURKHART AND J.K. STOLLER

UPCOMING FEATURES

- **The heart failure pandemic**
  Changes in the treatment of heart disease and the aging population will make treating heart failure one of medicine's greatest challenges.
- **Invasive strep A: Recognizing the symptoms**
  This devastating disease is becoming more common. Quick recognition is needed to save lives.
- **Colorectal cancer screening**
  Making sense of the different guidelines for risk stratification and screening.
- **Depression in primary care patients**
  Patients with depression often present with somatic complaints rather than psychological ones.

INTERNAL MEDICINE BOARD REVIEW

A 61-year-old woman with thrombocytopenia and a rash 209
A self-quiz on a difficult clinical case.
P. MAZZONE AND C. NIELSEN

EDITORIAL

Alternative medicine: Underevaluated or ineffective? 215
Ignorance of what our patients are taking is not bliss.
J.D. CLOUGH

THE CLINICAL PICTURE

Giant cell arteritis: Biopsy may not be diagnostic 218
Biopsy of suspected giant cell arteritis may be diagnostic in only 50% of cases.
G.S. HOFFMAN

CANCER DIAGNOSIS AND MANAGEMENT

The high cost of terminal care: Balancing conflicting goals 219
In caring for patients at the end of life, physicians are often torn by conflicting goals.
M. MARKMAN

DEPARTMENTS

CME Credit Test 223
Current guidelines state that participants in CME activities should be made aware of any affiliation or financial interest that may affect an author's article. Each author has been requested to complete a conflict of interest statement. The names of any authors declaring a potential conflict of interest are indicated with an asterisk.
