FROM THE EDITOR

Unproven therapies and media hype 267
We should be wary of unproven treatments that may be worse than the disease.
J.D. CLOUGH

1-MINUTE CONSULTS

Brief answers to specific clinical questions

■ Should patients with documented or probable coronary artery disease routinely be placed on beta-blockers before noncardiac surgery? 273
Evidence from randomized, controlled trials indicates that most patients should receive beta-blockers in this situation.
J.H. ISAACSON

■ Can fibromyalgia and chronic fatigue syndrome be cured by surgery? 277
The hypothesis is interesting, but data are lacking.
W.S. WILKE

■ Should an ACE inhibitor be stopped if signs of renal insufficiency appear? 280
One must consider the magnitude of the decline and the expected benefits of continuing the medication.
A. MORALES AND V.W. DENNIS

MEDICAL GRAND ROUNDS

Performance-enhancing substances: 283
What athletes are using
Use of performance-enhancing substances is widespread, even among amateur athletes. Here is a rundown of the effects, legal status, and potential for abuse of some of the more common substances.
J.A. KRCIK

MEDICAL GRAND ROUNDS

Falls in elderly patients: 303
Predictable and preventable
Falls in the elderly are not random occurrences caused solely by bad luck—they are predictable. And what can be predicted can often be prevented.
R. PALMER

MEDICAL GRAND ROUNDS

Legionnaires’ disease: Seek and ye shall find
Contrary to popular opinion, Legionnaires’ disease is common. New tests for it will make people realize just how common it is.

V.L. YU

INFECTION CONTROL

Handwashing compliance: What works?
Compliance with handwashing guidelines rarely exceeds 50%, and physicians are the worst offenders. Plain soap and water may not be enough.

J.M. SERKEY AND G.S. HALL

REVIEW

Immunizations in adult immunocompromised patients: Which to use and which to avoid
Immunocompromised patients are particularly susceptible to infectious diseases, but they may not always receive the vaccines they need for protection.

R.K. AVERY

REVIEW

Safe use of sildenafil in patients with coronary artery disease
Despite reports of myocardial infarction and sudden cardiac death in men taking sildenafil (Viagra), most evidence indicates the drug is safe, effective, and well tolerated in most men with coronary artery disease.

H.S. BUSH

REVIEW

Dofetilide (Tikosyn): A new drug to control atrial fibrillation
The pharmacology of dofetilide, the evidence of its effectiveness, and the appropriate precautions in using it.
