FROM THE EDITOR

C-reactive protein: It’s back 475
Who would have thought that CRP, long used in rheumatology, would be a marker of coronary disease?

J.C. CLOUGH

1-MINUTE CONSULT

Brief answers to specific clinical questions

I When should digoxin be used in patients with diastolic dysfunction? 481
Treatment with digoxin must be individualized.

M.H. YAMANI

I Is glucosamine an effective treatment for osteoarthritis pain? 494
Glucosamine shows promise, but studies had flaws that render much of the data inconclusive.

M. HOOPER

MEDICAL GRAND ROUNDS

The promise and reality of nitric oxide in the diagnosis and treatment of lung disease 486
Extensive research has shown mixed results.

R.A. DWEIK

MEDICAL GRAND ROUNDS

Microbial drug resistance and the roles of the new antibiotics 496
Indiscriminate use of broad-spectrum antibiotics such as vancomycin and quinolones is promoting antibiotic resistance.

D.L. LONGWORTH

REVIEW

Inflammatory myopathies: Narrowing the differential diagnosis 505
How to differentiate inflammatory myopathy from other causes of muscle weakness.

K. RENDT

C-reactive protein: A ‘golden marker’ for inflammation and coronary artery disease 521
Elevated levels of CRP are associated with increased cardiovascular risk.

V.B. PATEL, M.A. ROBBINS, AND E.J. TOPOL CONTINUED ON PAGE 478
CONTINUED FROM PAGE 476

EDITORIAL

C-reactive protein elevation can be caused by conditions other than inflammation and may reflect biologic aging

CRP elevations are a sensitive test for inflammation, but are not specific.

I. KUSHNER

EDITORIAL

Evidence of smoke and atherosclerotic fire

Why it is premature to extend the clinical use of the highly sensitive CRP assay as a test for coronary disease.

B.F. MANDELL

REVIEW

It's a rave new world:

Rave culture and illicit drug use in the young

New and potentially dangerous illicit drugs are popular among young people today.

E.S. ROME

PATIENT INFORMATION

Date rape drugs:

What parents should know

EMERGING INFECTIONS

West Nile fever: Here to stay and spreading

Most cases are asymptomatic, but some patients develop encephalitis or even die. Public health measures are paramount.

J. PILE

IM BOARD REVIEW

Anticoagulation therapy in an elderly woman with atrial fibrillation

What is the cause of this patient's symptoms? A self-test on a clinical case.

A. MARschALK AND B.J. MESSINGER-RAPPORT

REVIEW

Using aspirin and ACE inhibitors in combination: Why the hullabaloo?

Preliminary, mostly observational data indicate that aspirin may counteract ACE inhibitors. We offer recommendations.
