**FROM THE EDITOR**

Cyber-CME and the *Journal's* computer-literate readers

Congratulations to you, our readers, on your adaptability and computer literacy.

J.D. Clough

**REVIEW**

Relieving migraine pain: Sorting through the options

Even with effective treatments, including new drugs in convenient dosage forms, the key is still a good working patient-physician relationship.

L.K. Mannix

**PATIENT INFORMATION**

Migraine treatments—what you can expect

**REVIEW**

Polycystic ovary syndrome: Pathogenesis and treatment over the short and long term

PCOS can lead to serious sequelae such as endometrial or ovarian cancer, diabetes mellitus, and coronary artery disease.

T.L. Marx and A.E. Mehta

**1-MINUTE CONSULT**

Brief answers to specific clinical questions

Should everyone with a recent myocardial infarction receive a beta-blocker and an ACE inhibitor?

Yes, except for those with the standard contraindications to these drugs.

J.C. Hostetter and S. Ghaffari

REVIEW

New guidelines: What to do about an unexpected positive tuberculin skin test
With tuberculosis declining in prevalence, the focus is shifting to testing only persons at increased risk.

C. Curley

PATIENT INFORMATION
If your tuberculosis skin test is positive

REVIEW

Thyrotoxicosis and the cardiovascular system: Subtle but serious effects
One should suspect thyrotoxicosis in patients with palpitations, tachycardia, exercise intolerance, or dyspnea on exertion.

M. Roffi, F. Cattaneo, and E.J. Topol

1-MINUTE CONSULT

Brief answers to specific clinical questions

Alosetron (Lotronex) is back: Should I use it to treat my patients with irritable bowel syndrome?
The FDA recently approved the remarketing of alosetron, but with strict limitations.

B. Shen and E.E. Soffer

IM BOARD REVIEW

A 62-year-old man with sudden onset of orthopnea and left shoulder weakness and pain
What is the cause of this patient's symptoms? A self-test.

W.C. Cook and J. Chapman

DEPARTMENTS

CME Self-test
