TABLE OF CONTENTS

FROM THE EDITOR

Hot flashes: Statistics and common sense 522

In evidence-based medicine, after weighing the data, we still have to apply common sense—and include the patient in the decision-making process.

J.D. CLOUGH

REVIEW

Spinal tuberculosis deserves a place on the radar screen 537

There is no cause for complacency about tuberculosis. Spinal involvement may be the first manifestation.

R.F. McLAIN AND C. ISADA

CURRENT DRUG THERAPY

The promise of targeted therapy: Cancer drugs become more specific 551

Cancer therapy is getting smarter, with new drugs that act specifically against cancer cells.

E. SEGOTA AND R.M. BUKOWSKI

REVIEW

A strategy to decrease the use of risky drugs in the elderly 561

Some medications are best avoided in elderly patients—and pharmacists can help physicians avoid them. We discuss our experience with reducing the use of three medications: meperidine, diphenhydramine, and amitriptyline.

S.M. FOSNIGHT, C.M. HOLDER, K.R. ALLEN, AND S. HAZELETT

REVIEW

Spontaneous bacterial peritonitis: Recent data on incidence and treatment 569

Spontaneous bacterial peritonitis is more common than previously thought. Cirrhotic patients with ascites are particularly susceptible. When it is discovered, something must be done quickly.

M.A. PARSI, A. ATREJA, AND N.N. ZEIN

CONTINUED ON PAGE 526

CONTINUED FROM PAGE 525

REVIEW

Treatment options for menopausal hot flashes 578

Alternatives to hormone therapy exist, but none is as effective as hormone therapy, and none is approved by the US Food and Drug Administration for this purpose.

A. SIKON AND H.L. THACKER

PATIENT INFORMATION **Coping with the symptoms of menopause** 583

EDITORIAL

The sports physical: One-on-one is OK; one-on-300 is not 585

Too many of the 8 million young athletes in the United States will undergo a preparticipation physical examination that is too cursory to be of much use.

D.S. MOODIE

REVIEW

What kind of physical examination does a young athlete need before participating in sports? 587

Recommendations exist for preparticipation physical examinations, but there is no national standard, and the recommendations are not widely followed.

T.M. MICK AND R.J. DIMEFF

PATIENT-ORIENTED EVIDENCE THAT MATTERS (POEMs)

- **Hormone replacement therapy with estrogen alone increases strokes, decreases fractures** 529
- **Virtual colonoscopy not accurate yet** 530
- **Antibiotics ineffective for prevention of recurrent MI** 532
- **Moxifloxacin is slightly more effective than alternatives in acute exacerbations of chronic bronchitis** 533
