B. F. MANDELL

**COMMENTARY**.....

**CURRENT DRUG THERAPY**.....  
**Statins: The case for higher, individualized starting doses** **811**

We're not getting our patients' low-density lipoprotein cholesterol down to goal levels. We would do better by starting at a higher dose if the patient has a higher baseline level.

P.H. JONES

**1-MINUTE CONSULT**.....  
**How soon can a patient undergo noncardiac surgery after receiving a drug-eluting stent?** **818**

Lacking direct data, we base our approach on data from patients with bare-metal stents and from patients receiving antiplatelet therapy for acute coronary syndromes.

H.H. WEITZ

**IMAGING IN PRACTICE**.....  
**Diagnostic imaging approach to pulmonary embolism** **821**

A man with cancer presents with new dyspnea and low-grade fever. What is the best diagnostic approach?

J.W. STENGEL, D.M. EINSTEIN, B.R. HERTS, AND R.J. GRAHAM

**CURRENT DRUG THERAPY**.....  
**Angiotensin-receptor blockers: Benefits beyond lowering blood pressure** **825**

These drugs improve the prognosis more than one would expect from their effect on blood pressure alone.

R.L. SILVERSTEIN AND C.V.S. RAM

**MEDICAL GRAND ROUNDS**.....  
**Managing short bowel syndrome: Making the most of what the patient still has** **833**

Eating and drinking are better than parenteral nutrition.
