TABLE OF CONTENTS

FROM THE EDITOR

Is a pound of prevention better than an ounce of prevention?   729
With statins, should we “start low and go slow” or adopt a new paradigm?
B.F. MANDELL

COMMENTARY

Malfunctions in implantable cardiac devices: 736
Putting the risk in perspective
A device recall does not call for panic. Physicians should weigh the risks and benefits for the individual patient.
J.D. BURKHARDT AND B.L. WIKOFF

EDITORIAL

Dose-related statin myopathy: Is it an issue?  751
Higher doses lead to more cases of myopathy, a potentially serious problem. Fortunately, the incidence is very low.
R.L. WORTMANN

REVIEW

Alopecia areata:  758
What to expect from current treatments
Alopecia areata often resolves on its own, but some treatment is often needed due to the psychosocial impact.
N.C. DOMBRowski AND W.F. BERGFELD

REVIEW

Restless legs syndrome:  769
Keys to recognition and treatment
Although the condition is common, a high index of suspicion is needed to diagnose it.
J.F. AVECILLAS, J.A. GOLISH, C. GIANNINI AND J.C. YATACO

REVIEW

Emerging care for type 2 diabetes:  791
Using insulin to reach lower glycemic goals
Experts are advocating earlier, more aggressive treatment of type 2 diabetes.
M.N. FEINGLOS AND M.A. BETHEL

REVIEW

Auto-positive end-expiratory pressure:  801
Mechanisms and treatment
This common problem in mechanical ventilation increases the work of breathing, worsens gas exchange, and decreases cardiac output.
M.M. MUGHAL, D.A. CULVER, O.A. MINAI, AND A.C. ARROLIGA

CURRENT DRUG THERAPY

Statins: The case for higher, individualized starting doses

We’re not getting our patients’ low-density lipoprotein cholesterol down to goal levels. We would do better by starting at a higher dose if the patient has a higher baseline level.

P.H. Jones

1-MINUTE CONSULT

How soon can a patient undergo noncardiac surgery after receiving a drug-eluting stent?

Lacking direct data, we base our approach on data from patients with bare-metal stents and from patients receiving antiplatelet therapy for acute coronary syndromes.

H.H. Weitz

IMAGING IN PRACTICE

Diagnostic imaging approach to pulmonary embolism

A man with cancer presents with new dyspnea and low-grade fever. What is the best diagnostic approach?

J.W. Stengel, D.M. Einstein, B.R. Herts, and R.J. Graham

CURRENT DRUG THERAPY

Angiotensin-receptor blockers: Benefits beyond lowering blood pressure

These drugs improve the prognosis more than one would expect from their effect on blood pressure alone.

R.L. Silverstein and C.V.S. Ram

MEDICAL GRAND ROUNDS

Managing short bowel syndrome: Making the most of what the patient still has

Eating and drinking are better than parenteral nutrition.

N. Parekh, D. Seidner, and E. Steiger

PATIENT-ORIENTED EVIDENCE THAT MATTERS (POEMS)

Rehabilitation is nearly as effective as spinal fusion for chronic back pain

Rifaximin prevents travelers’ diarrhea in students in Mexico

DEPARTMENTS
