B. F. MANDELL

1-MINUTE CONSULT

When should prophylactic anticoagulation begin after a hip fracture? **785**

The short answer is *immediately*, but several issues need consideration before starting.

P. J. GRANT AND A. K. JAFFER

REVIEW

Migraine prophylaxis: Who, why, and how **793**

If a patient has frequent, severely debilitating migraine headaches, prophylactic treatment may help. But only about half of patients obtain a 50% or greater reduction in attacks.

J. LOJ AND G. D. SOLOMON

CURRENT DRUG THERAPY

Is digoxin a drug of the past? **821**

This old drug is still useful, with some caveats. It is no longer the cornerstone of heart-failure treatment, but it can be beneficial as an adjunct. Serum levels should probably be kept lower than in the past.

M. H. PERVAIZ, M. G. DICKINSON, AND M. YAMANI

REVIEW

Tending to the musculoskeletal problems of obesity **839**

Obese patients often hear that any ache or pain they have is due to their excess weight and will resolve with weight loss. The truth is more subtle, but weight loss *can* make a substantial difference.
