

TABLE OF CONTENTS

FROM THE EDITOR.....

Old drug, new use, continued vigilance 309

Colchicine, an old and familiar drug for gout, has found another use in preventing and treating pericarditis. But familiarity should not dampen vigilance.

B. F. MANDELL

REVIEW.....

Parkinson disease: Managing a complex, progressive disease at all stages 313

Parkinson disease is complex to manage. Its presentation can vary, as can its response to treatment. Physicians tend to focus on its motor symptoms, but many patients find nonmotor symptoms equally troublesome.

M. L. GIROUX

REVIEW.....

In vitro fertilization update 329

The science of in vitro fertilization has improved considerably in the last 25 years. We provide an overview of the current and experimental techniques of assisted reproductive technology.

J. M. GOLDBERG, T. FALCONE, AND M. ATTARAN

REVIEW.....

Anabolic steroid abuse: Psychiatric and physical costs 341

Anabolic-androgenic steroid abuse is no longer confined to professional athletes. Physicians should be aware of its signs and symptoms so that they can address its adverse effects and treat it.

F. TALIH, O. FATTAL, AND D. MALONE JR

MEDICAL GRAND ROUNDS.....

Viral infections and the kidney: HIV, hepatitis B, and hepatitis C 353

Ten years ago, viral glomerulonephritis was usually regarded as untreatable. Now treatments are available for the top three causes: HIV, hepatitis B, and hepatitis C.

G. APPEL

IMAGING IN PRACTICE

Intravenous iodinated contrast agents: Risks and problematic situations 361

Many diagnostic imaging studies use intravenous contrast media. Although these agents are generally safe, they do pose some risk of adverse reactions.

K.L. BUI, J.D. HORNER, B.R. HERTS, AND D.M. EINSTEIN

CURRENT DRUG THERAPY

Newer hormonal therapies: Lower doses; oral, transdermal, and vaginal formulations 369

We review some of the hormonal regimens that have been approved in the past 5 years.

M.S. SIVANANDY, N. MASIMASI, AND H.L. THACKER

IM BOARD REVIEW

Neurologic effects of hyponatremia and its treatment 377

Twenty-one days after surviving a hemorrhagic stroke, the patient develops new neurologic symptoms. A computed tomographic scan shows new cerebral edema. Her serum sodium concentration is 121 mmol/L.

P. WIDDESS-WALSH, V. SABHARWAL, S. DEMIRJIAN, AND M. DEGEORGIA

1-MINUTE CONSULT

Should all patients with acute pericarditis be treated with colchicine? 385

Colchicine should be considered a first-line treatment for acute pericarditis and for preventing recurrent episodes.

H. SALTZMAN AND H.H. WEITZ

PATIENT-ORIENTED EVIDENCE THAT MATTERS (POEMs)

- **Antioxidants may increase mortality** 368
- **Diet, exercise, drugs may prevent diabetes in high-risk patients** 384
- **Optimal dosing for thromboprophylaxis in medical inpatients** 388
- **Glitazones may be beneficial after percutaneous coronary intervention** 390

DEPARTMENTS

- CME Calendar** 312
- CME Self-test Online** 391

UPCOMING FEATURES

- **Should heart failure be treated differently in women?**
- **Ischemic heart disease in women: Atypical presentations, different mechanisms**
- **The protean neurologic effects of varicella zoster infections**
- **Is colorectal cancer screening really beneficial?**
- **Newer antipsychotic drugs come with newer side effects**
- **Painful shoulder: When to inject, when to refer**
- **Cardiology update: Preoperative evaluation, stents, statins**
