#### REVIEW

**The painful shoulder:** 473

*When to inject and when to refer*

Many physicians find shoulder pain difficult to sort out and treat. However, most cases can be diagnosed in a 5-minute history and physical examination and treated with a combination of physical therapy, injections, and time.

**M. J. CODSI**

**The protean neurologic manifestations of varicella-zoster virus infection** 489

Varicella-zoster virus reactivation can produce a number of neurologic complications, including herpes zoster (shingles), postherpetic neuralgia, vasculopathy, myelitis, neurologic disease without rash, and necrotizing retinitis.

**Cardiovascular medicine update 2007:** 505

*Perioperative risk, carotid angioplasty, drug-eluting stents, stronger statins*

Should patients with coronary artery disease who need noncardiac surgery undergo angioplasty first to lessen their perioperative risk? Is percutaneous carotid angioplasty an acceptable alternative to open surgery? Are drug-eluting stents safe in the long term? What is the best regimen and goal for managing lipid levels in patients with coronary artery disease?
