CORRECTION

Antibiotic prophylaxis dosage error

In the February 2008 issue, the article "Infective endocarditis prophylaxis before dental procedures: new guidelines spark controversy" by Dr. Alice Kim and Dr. Thomas Keys (pages 89-92) contained a typographical

error. In TABLE 2, "Antibiotic prophylactic regimens" on page 91, the dose of azithromycin or clarithromycin in adults was incorrect. It should be 500 mg.

What questions do you want answered?

We want to know what questions you want addressed in "1-Minute Consult." All questions should be on practical, clinical topics.
