TABLE OF CONTENTS

FROM THE EDITOR

Upgrades to our CME test and to www.ccjm.org 550

We recently upgraded our Web-based manuscript tracking system, and we are continuing to expand and improve our educational offerings to our readers.

B.F. MANDELL AND P.E. CANUTO

REVIEW

Identifying serious causes of back pain: Cancer, infection, fracture 557

Most patients with back pain have a benign condition, but tumors, infections, and fractures must be considered during an initial evaluation because overlooking them can have serious consequences.

K. SIEMIONOW, M. STEINMETZ, G. BELL, H. ILASLAN, AND R.F. McLAIN

THE CLINICAL PICTURE

Sudden hair loss associated with trachyonychia 567

A 30-year-old woman has been having episodes of sudden hair loss in well-demarcated areas of her scalp for the past 6 months. What is the most likely diagnosis?

S. VAÑÓ-GALVÁN, S. ABOÍN, S. BEÀ-ARDEBOL, AND J.L.S. SÁNCHEZ-METEOS

REVIEW

IgA nephropathy: Challenges and opportunities 569

We now have a reasonably complete understanding of the pathogenesis of this disease, but its etiology remains mysterious, its therapy remains largely empiric, and its course remains hard to predict. Many opportunities exist for improvement.

R.J. GLASSOCK

REVIEW

Take charge of your e-mail! 577

Although e-mail is supposed to help people save time, for many it has become a burden. You can fight e-mail overload by taking steps to decrease the amount of unwanted e-mail you receive and by managing your inbox in an organized manner.

N.B. MEHTA, A. ATREJA, AND A. JAIN

MEDICAL GRAND ROUNDS

Update in infectious disease treatment 584

Important studies in infectious disease over the last year cover *Clostridium difficile*-associated diarrhea, the safety of cefepime, acute sinusitis, Bell palsy, antifungal prophylaxis in patients undergoing chemotherapy, and invasive candidiasis.

D.L. LONGWORTH

REVIEW

**Congenital long QT syndrome: 591
Considerations for primary care physicians**

We now know more about the genetic basis of different types of long QT syndrome and their clinical implications. In one type, patients can die suddenly during exercise, in another, during inactivity, and in a third, when startled, such as by an alarm clock. The right therapy can dramatically reduce the risk.

E. LEVINE, S.Z. ROSERO, A.S. BUDZIKOWSKI, A.J. MOSS, W. ZAREBA, AND J.P. DAUBERT

IMAGING IN PRACTICE

**A 44-year-old man with hemoptysis: 601
A review of pertinent imaging studies
and radiographic interventions**

What imaging tests would be helpful in this patient's evaluation? We outline our approach.

A. SIRAJUDDIN AND T.-L.H. MOHAMMED
