Table of Contents

From the Editor .................................................................
Preventing clots: 742
Don’t let the complex overshadow the simple
Although we often approach anticoagulation therapy with a confidence born of familiarity, it is not for the faint of heart.
B.F. Mandell

Editorial ..............................................................................
Intracerebral hemorrhage: 743
Pick your poison
Whether to resume anticoagulant therapy after an intracerebral hemorrhage requires careful consideration of many factors, including patient preferences and tolerance of different levels of risk.
F. Michota

1-Minute Consult ................................................................
How soon after hip fracture surgery should a patient start bisphosphonates?
Starting a bisphosphonate too soon after surgery could disrupt bone remodeling and delay fracture repair.
M. Seton

Medical Grand Rounds ....................................................
What’s new in treating older adults? 770
Recent studies and trials regarding bone loss, dialysis outcomes, dementia, and other topics.
B. Messinger-Rapport

Review ...............................................................................
Should anticoagulation be resumed after intracerebral hemorrhage?
In selected patients, the potential benefit of resuming anticoagulation outweighs the considerable risk.
J.N. Goldstein and S.M. Greenberg

REVIEW

Approach to a low TSH level: 803
Patience is a virtue
Confronted with a low TSH level, physicians should not jump to the conclusion that it is due to a hyperthyroid state.
K.M. PANTALONE AND C. NASR

REVIEW

Influenza 2010-2011: 812
Lessons from the 2009 pandemic
The 2009 pandemic of influenza A (H1N1) was less severe than some others, thanks in part to advances in diagnosis, treatment, and public health.
M.G. ISON AND N. LEE

REVIEW

When ‘blue babies’ grow up: 821
What you need to know about tetralogy of Fallot
Children born with tetralogy of Fallot and other congenital heart defects are living longer—long enough, eventually, to present to your clinic.
D. FOX, G.P. DEVENDRA, S.A. HART, AND R.A. KRASUSKI

DEPARTMENTS

CME Calendar 747
Letters to the Editor 762
Readers comment on preventing glucocorticoid-induced osteoporosis (August 2010) and on electronic medical records (July 2010).

Directions for taking CME tests online 829
To receive CME credit, read any or all of the CME-certified articles in this issue (those that carry the CME logo), then go to www.ccjm.org to take the test for the article or articles you select. It should take up to 1 hour to complete the activity for each article.
Release date: November 1, 2010
Expiration date: October 31, 2011
