# Table of Contents

## From the Editor

### Why is fixing the plumbing so difficult?

For carotid stenosis, a catheter-based procedure would seem safer than endarterectomy, but reality is not always so simple.

**B.F. Mandell**

---

## The Clinical Picture

### Cornflake-like scales on the ankles and feet

An 81-year-old woman presents with slowly growing, asymptomatic lesions on both feet and ankles. Which test should be ordered to establish the diagnosis?

**C. Gómez-Fernández, B.C. Verrier, L.S. Canalejas, R.M.A. de Celada, and P.H. Pinto**

---

## Current Drug Therapy

### MAO inhibitors: Risks, benefits, and lore

Monoamine oxidase inhibitors were the first antidepressants introduced. Interest in their use is reviving.

**M. Wimbiscus, O. Kostenko, and D. Malone**

---

## 1-Minute Consult

### Should alpha-blockers ever be used as antihypertensive drugs?

They are not first-line drugs, but they can be second-line or third-line add-on drugs if blood pressure is not under control.

**G. Rossitto, G. Kamath, and F.H. Messerli**

---

## Interpreting Key Trials

### Understanding the CREST results.

Carotid stenting vs surgery: Parsing the risk of stroke and MI

For patients with carotid artery stenosis, percutaneous intervention with stenting is as good as surgery—with some qualifications.

**O. Aksoy, S.R. Kapadia, C. Baizier, W.M. Clark, and M.H. Shishehbor**

Medical Grand Rounds

Vitamin D and the heart: Why we need large-scale clinical trials

Despite enthusiasm for vitamin D, no large-scale primary prevention trial has used cardiovascular disease or cancer as a prespecified primary outcome.

J.E. Manson

Review

The homocysisteine hypothesis: Still relevant to the prevention and treatment of cardiovascular disease?

Elevated homocysterine is a risk factor, and vitamins lower homocysteine levels. But does vitamin supplementation prevent cardiovascular events?

J.M. Abraham and L. Cho

Review

Managing gout: How is it different in patients with chronic kidney disease?

The goals are the same, but the choice and dosage of drugs may need to be modified.

H. El-Zawawy and B.F. Mandell

Departments

Letters to the Editor

Readers comment on nutritional supplementation after bariatric surgery (July 2010) and on glucocorticoid-induced osteoporosis (August 2010).
