Vaccination: An option not to be ignored  151

Outbreaks of measles are seemingly on the rise, mainly because of lower vaccination rates, which are in part due to the unfounded fear that the vaccine causes autism.

B.F. MANDELL

INTERPRETING KEY TRIALS

Treating silent reflux disease does not improve poorly controlled asthma  155

A recent multicenter trial indicated that empirically prescribing a proton pump inhibitor does not help control asthma symptoms and that current guidelines need to be reevaluated.

EDITORIAL

Stenting for atherosclerotic renal artery stenosis:  164
One poorly designed trial after another

The three randomized trials of stenting vs medical therapy published so far are so seriously flawed that it is impossible to make treatment decisions based on their results.

M.D. WEINBERG AND J.W. OLIN

REVIEW

Stenting atherosclerotic renal arteries:  178
Time to be less aggressive

It is time to strongly reconsider the current aggressive approach to revascularization of stenotic renal arteries and to take a more coordinated, critical approach.

J.F. SIMON

INTERPRETING KEY TRIALS

Interpreting the JUPITER trial:  191
Statins can prevent VTE, but more study is needed

The incidence of venous thromboembolism in people taking rosuvastatin (Crestor) 20 mg/day was about half that in people taking placebo. This was a relatively healthy population, and the incidence in both groups was low.

A. PEREZ AND J.R. BARTHOLOMEW

CONTINUED ON PAGE 148
When and how to evaluate mildly elevated liver enzymes in apparently healthy patients
Not all asymptomatic people with a mildly elevated liver enzyme value need an extensive evaluation, which can be costly, anxiety-provoking, and risky.
G. Aragon and Z. M. Younossi

Palpable purpura
A healthy 47-year-old woman presents with a 3-day history of widespread asymptomatic lesions in the extremities, fever, arthralgias, and mild abdominal pain. What is the diagnosis?

Measles: Not just a childhood rash
Outbreaks continue to be reported in communities with a high number of unvaccinated people. Most cases are linked to international travel.
C. Sabella
