Vaccination: An option not to be ignored 151
Outbreaks of measles are seemingly on the rise, mainly because of lower vaccination rates, which are in part due to the unfounded fear that the vaccine causes autism.
B.F. MANDELL

INTERPRETING KEY TRIALS
Treating silent reflux disease does not improve poorly controlled asthma
A recent multicenter trial indicated that empirically prescribing a proton pump inhibitor does not help control asthma symptoms and that current guidelines need to be reevaluated.
B.P. RISCILL, J.P. PARSONS, AND J.G. MASTRONARDE

EDITORIAL
Stenting for atherosclerotic renal artery stenosis: 164 One poorly designed trial after another
The three randomized trials of stenting vs medical therapy published so far are so seriously flawed that it is impossible to make treatment decisions based on their results.
M.D. WEINBERG AND J.W. OLIN

REVIEW
Stenting atherosclerotic renal arteries: 178 Time to be less aggressive
It is time to strongly reconsider the current aggressive approach to revascularization of stenotic renal arteries and to take a more coordinated, critical approach.
J.F. SIMON

INTERPRETING KEY TRIALS
Interpreting the JUPITER trial: 191 Statins can prevent VTE, but more study is needed
The incidence of venous thromboembolism in people taking rosuvastatin (Crestor) 20 mg/day was about half that in people taking placebo. This was a relatively healthy population, and the incidence in both groups was low.
A. PEREZ AND J.R. BARTHOLOMIEW

**REVIEW**

When and how to evaluate mildly elevated liver enzymes in apparently healthy patients

Not all asymptomatic people with a mildly elevated liver enzyme value need an extensive evaluation, which can be costly, anxiety-provoking, and risky.

G. ARAGON AND Z.M. YOUNOSSI

**THE CLINICAL PICTURE**

Palpable purpura

A healthy 47-year-old woman presents with a 3-day history of widespread asymptomatic lesions in the extremities, fever, arthralgias, and mild abdominal pain. What is the diagnosis?

S. ARIAS-SANTIAGO, J. ANEIROS-FERNÁNDEZ, M.S. GIRÓN-PRIETO, M.A. FERNÁNDEZ-PUGNAIRE, AND R. NARANJO-SINTES

**REVIEW**

Measles: Not just a childhood rash

Outbreaks continue to be reported in communities with a high number of unvaccinated people. Most cases are linked to international travel.

C. SABELLA

---

**UPCOMING FEATURES**

- Breaking the cycle of medication overuse headache
- Preventing and treating orthostatic hypotension: As easy as A, B, C
- Vaccine update
- Reducing the risks of foreign travel
- Should patients with mild asthma use inhaled steroids?
- MAO inhibitors: A second look
- Laryngopharyngeal reflux: More questions than answers
- When should amylase and lipase levels be repeated in acute pancreatitis?
