TABLE OF CONTENTS

FROM THE EDITOR ............................................................................ 407
Escaping the heat in the EMR pool
The electronic medical record (EMR) is a tool, and it performs at the skill level of the person using it.
B.F. MANDELL

COMMENTARY .................................................................................. 408
The electronic medical record: Diving into a shallow pool?
We should reassess the possible unintended consequences of the rush to adopt electronic medical records.
J.T. HANLON

COMMENTARY .................................................................................. 415
The electronic medical record: Learning to swim
Skepticism and vigilance are warranted, but so is optimism.
T.I. ABELSON

THE CLINICAL PICTURE ...................................................................... 422
The eyes: A window into the past
The patient, 33 years old and living in Southern California, has "spots" on the retina. What is the most likely diagnosis?
N.F. CRUM-CIANFLONE

THE CLINICAL PICTURE ...................................................................... 426
Pyogenic liver abscess
Klebsiella pneumoniae has emerged as the most common organism seen in pyogenic liver abscess.
N.T. NAZIR, J.D. PENFIELD, AND V. HAJJAR

CURRENT DRUG THERAPY

Coenzyme Q10: 435
A therapy for hypertension and statin-induced myalgia?
These supplements appear to be safe, but larger trials are needed to determine if they are truly effective.

M. WYMAN, M. LEONARD, AND T. MORLEDGE

REVIEW

Menstrual manipulation: 445
Options for suppressing the cycle
If they wish, women can have more control over when and if they menstruate, even though myths and misperceptions abound among clinicians.

C.W. HICKS AND E.S. ROME

REVIEW

Pharmacoresistant epilepsy: 457
From pathogenesis to current and emerging therapies
Almost one-third of people with epilepsy continue to have seizures despite appropriate treatment. We recommend early referral to an epilepsy center.

S. PATI AND A.V. ALEXOPOULOS

REVIEW

Bariatric surgery for type 2 diabetes: 468
Weighing the impact for obese patients
Bariatric surgery results in remission of diabetes in most patients. Why should this be?

S.R. KASHYAP, P. GATMAITAN, S. BRETHAUER, AND P. SCHAUER

UPCOMING FEATURES

- Do new tests make liver biopsy obsolete?
- Taking blood pressure: Too important to trust to humans?
- Managing coronary risk in HIV patients
- Can patients with COPD or asthma take a beta-blocker?
- Be proactive about glucocorticoid-induced osteoporosis
- Should antibiotics be given for aspiration pneumonia?
- A young woman with a breast mass
- Do new diabetes drugs cause pancreatitis?
