### Table of Contents

**From the Editor**

*Escaping the heat in the EMR pool*  407

The electronic medical record (EMR) is a tool, and it performs at the skill level of the person using it.

**B.F. Mandell**

**Commentary**

*The electronic medical record:*  408

Diving into a shallow pool?

We should reassess the possible unintended consequences of the rush to adopt electronic medical records.

**J.T. Hanlon**

**Commentary**

*The electronic medical record:*  415

Learning to swim

Skepticism and vigilance are warranted, but so is optimism.

**T.I. Abelson**

**The Clinical Picture**

*The eyes: A window into the past*  422

The patient, 33 years old and living in Southern California, has "spots" on the retina. What is the most likely diagnosis?

**N.F. Crum-Cianflone**

**The Clinical Picture**

*Pyogenic liver abscess*  426

*Klebsiella pneumoniae* has emerged as the most common organism seen in pyogenic liver abscess.

**N.T. Nazir, J.D. Penfield, and V. Hajiir**

CURRENT DRUG THERAPY ................................................................. 435
Coenzyme Q10: A therapy for hypertension and statin-induced myalgia?
These supplements appear to be safe, but larger trials are needed to determine if they are truly effective.

M. WYMAN, M. LEONARD, AND T. MORLEDGE

REVIEW ......................................................................................... 445
Menstrual manipulation: Options for suppressing the cycle
If they wish, women can have more control over when and if they menstruate, even though myths and misperceptions abound among clinicians.

C.W. HICKS AND E.S. ROME

REVIEW ......................................................................................... 457
Pharmacoresistant epilepsy: From pathogenesis to current and emerging therapies
Almost one-third of people with epilepsy continue to have seizures despite appropriate treatment. We recommend early referral to an epilepsy center.

S. PATI AND A.V. ALEXOPOULOS

REVIEW ......................................................................................... 468
Bariatric surgery for type 2 diabetes: Weighing the impact for obese patients
Bariatric surgery results in remission of diabetes in most patients. Why should this be?

S.R. KASHYAP, P. GATMAITAN, S. BRETHAUER, AND P. SCHAUER

DEPARTMENTS .................................................................................. 418
CME calendar
Directions for taking CME tests online
To receive CME credit, read any or all of the CME-certified articles in this issue (those that carry the CME logo), then go to www.ccjm.org to take the test for the article or articles you select. It should take up to 1 hour to complete the activity for each article.
Release date: July 1, 2010
Expiration date: June 30, 2011
