FROM THE EDITOR .....

**Exchanging the skin bleb for the test tube** 566

New blood tests are a positive step towards accurate recognition and treatment of patients with latent tuberculosis.

B.F. MANDELL

EDITORIAL .....

**Timeliness of treatment is more important than choice of reperfusion therapy** 567

The most important modifiable predictor of outcome in ST-segment elevation MI is the time to treatment, a biological truth that continues to be supported by clinical evidence.

E.R. BATES

1-MINUTE CONSULT .....

**Are antibiotics indicated for the treatment of aspiration pneumonia?** 573

Yes, for primary bacterial aspiration pneumonia and secondary bacterial infection of aspiration (chemical) pneumonitis, but not for uncomplicated chemical pneumonitis.

E. DAOU AND J. GUZMAN

THE CLINICAL PICTURE.....

**The shrinking woman** 583

A 45-year-old woman on dialysis has lost 20 cm in height over the past 8 years, despite two parathyroidectomy procedures. Would a third one help?

H.-Y. CHU AND P. CHU

THE CLINICAL PICTURE.....

**An ulcerated plaque on the hand** 585

A 73-year-old farmer has a lesion on the dorsum of his hand that bleeds intermittently. What is it?

H. HUSEIN-EL AHMED, J. ANEIROS-FERNÁNDEZ, S ARIAS-SANTIAGO, R.O. DEL OLMO, AND R. NARANJO-SINTES

REVIEW ..... 593

**Charcot neuroarthropathy:  
An often overlooked complication of diabetes**

Suspect this condition if a patient with long-standing, poorly controlled diabetes and peripheral neuropathy develops a red, hot, swollen foot without ulceration.

G. BOTEK, M.A. ANDERSON, AND R. TAYLOR

REVIEW ..... 606

**Interferon-gamma-release assays:  
Better than tuberculin skin testing?**

These new blood tests overcome some of the limitations of skin testing, but converting to them poses challenges.

C. MIRANDA, J.W. TOMFORD, AND S.M. GORDON

REVIEW ..... 616

**Hepatitis C virus:  
Prevention, screening, and interpretation of assays**

Patients at risk of hepatitis C virus infection should be screened for it so that they can be treated and potentially cured, or can at least avoid transmitting the disease to others.

M. ALBELDAWI, E. RUIZ-RODRIGUEZ, AND W.D. CAREY

REVIEW ..... 629

**Combined reperfusion strategies  
in ST-segment elevation MI: Rationale and current role**

In geographic areas where percutaneous coronary intervention (PCI) is not immediately available, the best strategy may be to give thrombolysis immediately and then to transfer the patient to a PCI hospital.

E.B. HANNA, T.A. HENNEBRY, AND M.S. ABU-FADEL

DEPARTMENTS ..... 579

**CME calendar**

**Directions for taking CME tests online**

To receive CME credit, read any or all of the CME-certified articles in this issue (those that carry the CME logo), then go to [www.ccmj.org](http://www.ccmj.org) to take the test for the article or articles you select. It should take up to 1 hour to complete the activity for each article.

Release date: September 1, 2010

Expiration date: August 31, 2011

# UPCOMING FEATURES

- Taking blood pressure: Too important to trust to humans?
- Should anticoagulation be resumed after intracerebral hemorrhage?
- Keeping elderly patients in their own home via the 'medical home'
- Can Alzheimer disease be prevented?
- Managing hyponatremia: When to go easy, when to go hard
- CPAP and beyond: Expanding uses for NIPPV in outpatients
- Geriatric update: Vitamin D, dementia, new drugs, and more
