# TABLE OF CONTENTS

**FROM THE EDITOR** .....

**Gene-based, rational drug-dosing: An evolving, complex opportunity** 218

Pharmacogenomics promises the opportunity to match the right drug and dose to the right patient. We are not there yet, but the day is coming.

B.F. MANDELL

**MEDICAL GRAND ROUNDS** .....

**Ending LGBT invisibility in health care: The first step in ensuring equitable care** 220

Lesbian, gay, bisexual, and transgender individuals experience health care disparities that will be eliminated only if clinicians elicit information in a thoughtful, nonjudgmental way.

H.J. MAKADON

**THE CLINICAL PICTURE** .....

**Leukemia cutis** 226

This condition occurs in 10% to 15% of patients with acute myeloid leukemia and is a poor prognostic sign.

C. TZIOTZIOS AND A. MAKRYGEORGOU

**IM BOARD REVIEW** .....

**Nausea, vomiting, and panic attacks in a 50-year-old woman** 233

Six months ago she started to have panic attacks that roused her from sleep. Lately, they have become more frequent and more severe. What is the cause?

J. BEAR AND F.A. MICHOTA

**EDITORIAL** .....

**Pharmacogenomics for the primary care provider: Why should we care?** 241

Personalized medicine promises to improve the quality and lower the cost of care if physicians integrate into practice useful new findings, such as information gleaned from pharmacogenomic testing.

K. TENG

REVIEW

**Pharmacogenomic testing: Relevance in medical practice Why drugs work in some patients but not in others** 243

Knowing their patients' genetic status, physicians could predict their response to certain drugs, such as clopidogrel (Plavix), warfarin (Coumadin), tamoxifen (Nolvadex), codeine, and psychotropic medications.

J.P. KITZMILLER, D.K. GROEN, M.A. PHELPS, AND W. SADEE

REVIEW

**Managing newly diagnosed atrial fibrillation: Rate, rhythm, and risk** 258

Treatment focuses on controlling the heart rate, preventing thromboembolic events, and, depending on symptoms, restoring and maintaining sinus rhythm.

T. CALLAHAN AND B. BARANOWSKI

REVIEW

**Giant cell arteritis: Suspect it, treat it promptly** 265

Giant cell arteritis is the most common form of vasculitis affecting older people. Physicians should be familiar with its variety of clinical presentations.

A. VILLA-FORTE

DEPARTMENTS

**CME Calendar** 232

**Correction: Airway pressure release ventilation** 240

Errors in the citation of sources for figures in Modrykamien A, Chatburn RL, Ashton RW. Airway pressure release ventilation: An alternative mode of mechanical ventilation in acute respiratory distress syndrome. *Cleve Clin J Med* 2011; 78:101-110.

**Directions for taking CME tests online** 271

To receive CME credit, read any or all of the CME-certified articles in this issue (those that carry the CME logo), then go to [www.ccjm.org](http://www.ccjm.org) to take the test for the article or articles you select. It should take up to 1 hour to complete the activity for each article.

Release date: April 1, 2011  
Expiration date: March 31, 2012

# UPCOMING FEATURES

- Prostate cancer: Sorting out the therapies
- Insulin for type 2 diabetes: When to start? Which insulin?
- Tinnitus: Patients don't have to 'just live with it'
- Cancer pain: Frequently asked questions
- Statin myopathy in the real world vs in clinical trials
- ST-segment depression, T-wave inversion: Differentiating the causes
- Dabigatran: How will this new anticoagulant change our practice?
- Sleep loss and the risk of diabetes

DEDICATED TO LIFELONG LEARNING
