## From the Editor

### The pain of cholesterol-lowering therapy

It seems that everyone “knows” that statins cause muscle pain, including many patients with hypercholesterolemia.

* B.F. Mandell

## Medical Grand Rounds

### Immune thrombocytopenia: No longer ‘idiopathic’

Once regarded as idiopathic, immune thrombocytopenia is now understood to involve both accelerated platelet destruction and impaired platelet production.

* K. McCrae

## The Clinical Picture

### Scar reactivation and dry cough

A 52-year-old woman has swelling and redness of seven old scars and a dry cough. What diagnostic test should be performed?

* G. Rech, R. Balestri, F. Bardazzi, B.M. Piraccini, and A. Patrizi

### Subphrenic abscess from a perforated duodenal ulcer

A 55-year-old man presents after 3 weeks of sharp epigastric pain radiating to the right upper quadrant, fever, and generalized weakness.

* Y. Shen, P. Ong, N. Gandhi, and A. Degirolamo

## Medical Grand Rounds

### How to manage type 2 diabetes in medical and surgical patients in the hospital

Many patients admitted to the hospital have diabetes mellitus—diagnosed or undiagnosed—and others develop hyperglycemia from the stress of hospitalization.

* G.E. Umpierrez
