TABLE OF CONTENTS

FROM THE EDITOR ................................................................................................................................. 354
The pain of cholesterol-lowering therapy
It seems that everyone “knows” that statins cause muscle pain, including many patients with hypercholesterolemia.

B.F. MANDELL

MEDICAL GRAND ROUNDS.................................................................................................................. 358
Immune thrombocytopenia: No longer ‘idiopathic’
Once regarded as idiopathic, immune thrombocytopenia is now understood to involve both accelerated platelet destruction and impaired platelet production.

K. McCRAE

THE CLINICAL PICTURE...................................................................................................................... 375
Scar reactivation and dry cough
A 52-year-old woman has swelling and redness of seven old scars and a dry cough. What diagnostic test should be performed?

G. RECH, R. BALESTRI, F. BARDAZZI, B.M. PIRACCINI, AND A. PATRIZI

THE CLINICAL PICTURE...................................................................................................................... 377
Subphrenic abscess from a perforated duodenal ulcer
A 55-year-old man presents after 3 weeks of sharp epigastric pain radiating to the right upper quadrant, fever, and generalized weakness.

Y. SHEN, P. ONG, N. GANDHI, AND A. DEGIROLAMO

MEDICAL GRAND ROUNDS.................................................................................................................. 379
How to manage type 2 diabetes in medical and surgical patients in the hospital
Many patients admitted to the hospital have diabetes mellitus—diagnosed or undiagnosed—and others develop hyperglycemia from the stress of hospitalization.

G.E. UMPIERREZ

IM BOARD REVIEW

Progressive muscle weakness: More there than meets the eye
A 56-year-old woman presents with proximal weakness in all four limbs. What are the possible causes?
S. ALBASHIR, L. OLANSKY, AND M. SASIDHAR

REVIEW

Statin myopathy: A common dilemma not reflected in clinical trials
When a patient taking a statin complains of muscle aches, is he or she experiencing statin-induced myopathy or some other problem? Should the statin be discontinued?
G. FERNANDEZ, E.S. SPATZ, C. JABLECKI, AND P.S. PHILLIPS

ST-segment depression and T-wave inversion: Classification, differential diagnosis, and caveats
Knowing the characteristic patterns is critical for a timely diagnosis of life-threatening disorders.
E.B. HANNA AND D.L. GLANCY

DEPARTMENTS

Letters to the Editor
Readers comment on iron therapy and infection (March 2011), and managing bloodstream infections (January 2011).

Correction
There was an error in the caption for FIGURE 2 in: Villa-Forte A. Giant cell arteritis: Suspect it, treat it promptly. Cleve Clin J Med 2011; 78:265–270.
