TABLE OF CONTENTS

FROM THE EDITOR

Home testing: The metamorphosis of attitudes about HIV infection
Most of us have not spent the past 25 years on the front line against the AIDS epidemic, but we all have been touched by it.

B.F. MANDELL

THE CLINICAL PICTURE

V1: The most important lead in inferior STEMI
A 63-year-old woman with diabetes and hypertension developed chest tightness. Her electrocardiogram showed ST-segment elevation in leads II, III, aVF, V1, and V2.

V. NAGARAJAN AND D.A. UNDERWOOD

A 60-year-old man with abdominal bruising
A man with liver cancer developed abdominal ecchymoses resembling the Cullen sign and flank ecchymoses resembling the Grey Turner sign.

D. DALAL AND S.E. MACE

IM BOARD REVIEW

Chronic lymphocytic leukemia and apparent hyperkalemia
The day after chemotherapy, the patient’s plasma potassium level was 7.7 mmol/L and the next day it rose to 10.9, but he had no signs or symptoms of hyperkalemia. What was the cause?

A. GEORGE, O. PANDEY, AND A. MORENO

REVIEW

Hypertension in the elderly: Some practical considerations
Treatment is challenging because of comorbidities and age-related changes. Some common scenarios are presented.

K.N. CHAUDHRY, P. CHAVEZ, J. GASOWSKI, T. GRODZICKI, AND F.H. MESSERLI
