# Table of Contents

## From the Editor

**Autism in the office**
To many, the image of autism is of a cute sandy-haired boy reciting the batting averages of baseball players. But the spectrum of autism is wide.

* B.F. Mandell

## Addressing Disparities in Health Care

**Lupus in Hispanics:**
A matter of serious concern
Some diseases are either more serious or more frequent in US Hispanics, and lupus is one of them. Prompt diagnosis is of paramount importance to prevent organ damage and death.

* G.J. Pons-Estel and G.S. Alarcón

## The Clinical Picture

**Bilateral adrenal masses**
In a woman with a thrombus in the aorta, imaging reveals bilateral high-density adrenal masses. What is the diagnosis?

* S. Saberi and N.H. Esfandiari

## Editorial

**Mild cognitive impairment:**
Challenges in research and in practice
Mild cognitive impairment is now a clinical reality seen by all practitioners dealing with older patients.

* H.R. Okhaví and R.M. Palmer

## Review

**Mild cognitive impairment:**
Hope for stability, plan for progression
Older patients often raise concerns about cognitive issues with their primary care physicians. This mild impairment may progress to dementia, remain stable, or even improve.

* B.B. Patel and N.W. Holland

REVIEW

Sessile serrated polyps: 865
Cancer risk and appropriate surveillance
The serrated polyp pathway is different than the pathway for conventional adenomas. What does finding these polyps on colonoscopy mean for patient care?

R. MAKkar, R.K. PAI, AND C.A. BURKE

EDITORIAL

Appreciating Asperger syndrome: 872
Implications for better care and outcomes
The behavior of an Einstein, Ford, Edison, or Beethoven might lead to a diagnosis of Asperger syndrome today.

H.C. SHANE

REVIEW

Is an adult with Asperger syndrome sitting in your waiting room?
The authors offer guidance on interacting with adult patients who have this disorder. They also address proposed diagnostic changes scheduled to take effect in 2013.

B. PRAYSON AND K. FRANCO

REVIEW

Statins and diabetes risk: 883
Fact, fiction, and clinical implications
The benefit of preventing serious cardiovascular events using statins seems to outweigh the higher risks of diabetes and poorer glycemic control.

M.B. ROCCO
