## Table of Contents

**From the Editor**

Exploring the human genome, and relearning genetics by necessity

The field of medical genetics continues to advance far beyond what many of us were exposed to in medical school.

B.F. Mandell

---

**The Clinical Picture**

### High creatinine 6 months after renal transplant

Ultrasonography showed a large fluid collection compressing the transplanted kidney. What is the diagnosis?

N. Singh and A.K. Agarwal

---

### A 26-year-old woman with a lump in her chest

Computed tomography revealed a necrotic mass and bony destruction of the inferior sternum, but no pulmonary parenchymal lesions. What is the most likely diagnosis?

V.D. Wagler, S. Huitron, and C.S. King

---

**Review**

Putting genome analysis to good use: Lessons from C-reactive protein and cardiovascular disease

Genomics research is paying off, not only by identifying people at risk of rare inherited diseases, but also by clarifying the pathogenic mechanisms of common ones.

L.C. Manace and M.W. Babyatsky

---

**Addressing Disparities in Health Care**

Asthma in African Americans: What can we do about the higher rates of disease?

To remedy disparities such as greater disease severity and higher rates of hospitalization and death, we need to ensure that all patients receive proper care and the knowledge they need to control their asthma.

S.K. Silvers and D.M. Lang

**Online Features**

**Free e-mail alerts**

To receive your free e-mail Table of Contents (eTOC) when a new issue of the Cleveland Clinic Journal of Medicine is released, just click on “Alerts” from any page at www.ccjm.org.

It is quick and easy. All you need is your e-mail address. No other registration information is required.

**Social Networking**

To post a CCJM article to Facebook or your favorite social networking site, just click on the icon at the bottom of any online article.
**UPCOMING FEATURES**

- CT screening for lung cancer: How to do it rationally
- Acute community-acquired bacterial meningitis in adults
- Chronic kidney disease in African Americans: Challenges, opportunities
- The promise and problems of personalized care
- Does surgery for GERD still have a role?
- Avoiding UV damage: Sunscreens and smoke screens
- Dengue fever: A reemerging concern among travelers

**REVIEW**

- **Endoscopic ultrasonography to evaluate pancreatitis**
  - This test has become well accepted in the workup of acute and chronic pancreatitis. Further study is needed in recurrent acute pancreatitis and minimal-change chronic pancreatitis.
  - S. ALBASHIR AND T. STEVENS

- **Update on contraceptive options: A case-based discussion**
  - Contraceptive counseling is both an art and a science. Here, the authors present several common scenarios.
  - K. TOUGH AND H.L. THACKER

**CURRENT DRUG THERAPY**

- **Protease inhibitors: Silver bullets for chronic hepatitis C infection?**
  - These new drugs are a major step forward, and multidrug regimens that include them are the new standard of care.
  - N. ALKHOURI AND N.N. ZEIN

**DEPARTMENTS**

- **Letters to the Editor**
  - Readers comment on the oral anticoagulant dabigatran (October 2011), and screening for cervical cancer (November 2011).

- **CME Calendar**

- **Correction**

- **Reviewers 2011**

- **Directions for taking CME tests online**
  - To receive CME credit, read any or all of the CME-certified articles in this issue (those that carry the CME logo), then go to www.ccjm.org to take the test for the article or articles you select. It should take up to 1 hour to complete the activity for each article.
  - Release date: March 1, 2012
  - Expiration date: February 28, 2013
