TABLE OF CONTENTS

FROM THE EDITOR ............................................................................ 162
Exploring the human genome, and relearning genetics by necessity
The field of medical genetics continues to advance far beyond what many of us were exposed to in medical school.
B.F. MANDELL

THE CLINICAL PICTURE ...................................................................... 174
High creatinine 6 months after renal transplant
Ultrasonography showed a large fluid collection compressing the transplanted kidney. What is the diagnosis?
N. SINGH AND A.K. AGARWAL

THE CLINICAL PICTURE ...................................................................... 177
A 26-year-old woman with a lump in her chest
Computed tomography revealed a necrotic mass and bony destruction of the inferior sternum, but no pulmonary parenchymal lesions. What is the most likely diagnosis?
V.D. WAGLER, S. HUITRON, AND C.S. KING

REVIEW ........................................................................................... 182
Putting genome analysis to good use: Lessons from C-reactive protein and cardiovascular disease
Genomics research is paying off, not only by identifying people at risk of rare inherited diseases, but also by clarifying the pathogenic mechanisms of common ones.
L.C. MANACE AND M. W. BABYATSKY

ADDRESSING DISPARITIES IN HEALTH CARE ........................................ 193
Asthma in African Americans:
What can we do about the higher rates of disease?
To remedy disparities such as greater disease severity and higher rates of hospitalization and death, we need to ensure that all patients receive proper care and the knowledge they need to control their asthma.
S.K. SILVERS AND D.M. LANG

REVIEW ........................................................................................................ 202
Endoscopic ultrasonography to evaluate pancreatitis
This test has become well accepted in the workup of acute and chronic pancreatitis. Further study is needed in recurrent acute pancreatitis and minimal-change chronic pancreatitis.
S. ALBASHIR AND T. STEVENS

REVIEW ........................................................................................................ 207
Update on contraceptive options: A case-based discussion
Contraceptive counseling is both an art and a science. Here, the authors present several common scenarios.
K. TOUGH AND H.L. THACKER

CURRENT DRUG THERAPY .................................................................. 213
Protease inhibitors: Silver bullets for chronic hepatitis C infection?
These new drugs are a major step forward, and multidrug regimens that include them are the new standard of care.
N. ALKHOURI AND N.N. ZEIN

DEPARTMENTS .................................................................................... 164
Letters to the Editor
Readers comment on the oral anticoagulant dabigatran (October 2011), and screening for cervical cancer (November 2011).

CME Calendar ...................................................................................... 176

Correction ............................................................................................ 222

Reviewers 2011 .................................................................................... 192

Directions for taking CME tests online ........................................................................ 223
To receive CME credit, read any or all of the CME-certified articles in this issue (those that carry the CME logo), then go to www.ccjm.org to take the test for the article or articles you select. It should take up to 1 hour to complete the activity for each article.
Release date: March 1, 2012
Expiration date: February 28, 2013
