TABLE OF CONTENTS

FROM THE EDITOR ................................................................. 306
Lung cancer screening: One step forward  
I never expected, perhaps naively, that cancer screening would be so challenging and contentious.
B.F. MANDELL

THE CLINICAL PICTURE ....................................................... 308
Hyperpigmentation and hypotension  
A 65-year-old man presents after 2 months of weakness, dizziness, and blurred vision. What test should be ordered?
K. SHAHEEN, A.H. ALRAIYES, M. BAIBARS, AND M.C. ALRAIES

ADDRESSING DISPARITIES IN HEALTH CARE ....................... 313
Disparities in prostate cancer  
in African American men:  
What primary care physicians can do  
Both biologic and socioeconomic factors may be to blame. Better screening may help to close the gap.
I. WU AND C.S. MODLIN

NEW SERIES ............................................................................. 329
Personalizing patient care  
Personalized health care has been anticipated for decades. Yet in its breadth and in the way we would like it to be practiced, it is still in its infancy.
K.A. TENG AND C. ENG

PERSONALIZING PATIENT CARE ........................................... 331
Family history:  
Still relevant in the genomics era  
Family history is still relevant, being a proxy for genetic, environmental, and behavioral risks to health.
M. DOERR AND K. TENG

CANCER DIAGNOSIS AND MANAGEMENT .............................. 337
The rationale for, and design of,  
a lung cancer screening program  
We are entering a new era in which lung cancer screening may be considered the standard of care.
P. MAZZONE, FOR THE CHEST CANCER CENTER AT CLEVELAND CLINIC

PATIENT EDUCATION ......................................................... 346
Lung cancer screening: What to expect
