TABLE OF CONTENTS

FROM THE EDITOR.......................................................................................... 595

The ‘T’ in ITP remains 595
The “T” has changed its meaning and the “P” is not necessary to make the diagnosis, but the disease formerly known as idiopathic thrombocytopenic purpura (ITP) remains important to diagnose.

B.F. MANDELL

THE CLINICAL PICTURE.................................................................................. 600

A woman with a swollen uvula 600
A woman on patient-controlled analgesia with morphine suddenly develops shortness of breath because of uvular swelling obstructing the airway. What is the diagnosis?

S.A. PANDE, K. RAGHAV, S. MEHTA, G. BABBAR, AND S. KANDPAL

POINT AND COUNTERPOINT ........................................................................ 608

The apples and oranges of cost-effectiveness: A rejoinder
A recent CCJM commentary used straw men to indict cost-effectiveness research.

C.I. UDEH AND B.L. UDEH

The conundrum of cost-effectiveness 610
The author of the commentary replies.

V. PRASAD

THE CLINICAL PICTURE.................................................................................. 616

Flashing lights, floaters, and reduced vision 616
A 62-year-old woman has numerous lobulated, yellowish, choroidal lesions in the left eye, and two similar but smaller lesions in the right eye. What is the cause?

A.H. ALRAIYES, M.C. ALRAIES, F.A. ALMEIDA, AND A.D. SINGH

IM BOARD REVIEW............................................................................................ 623

Fever, dyspnea, and hepatitis in an Iraq veteran
About 8 weeks after returning home, he presents with a cough, myalgia, headaches, fever, chills, drenching night sweats, and dyspnea on exertion. What is the most likely diagnosis?

R.L. GUTIÉRREZ AND J.D. HARTZELL

REVIEW
The role of aldosterone receptor antagonists in the management of heart failure: An update
Spironolactone (Aldactone) and eplerenone (Inspra) are now part of standard therapy. Still, they must be used cautiously, as they can cause hyperkalemia.
V. NAGARAJAN, M. CHAMSI-PASHA, AND W.H.W. TANG

REVIEW
Immune thrombocytopenia in adults: An update
Management has changed in the last decade, with new drugs and with increased awareness of treatment side effects.
S. THOTA, G. KISTANGARI, H. DAW, AND T. SPIRO

REVIEW
Using the ankle-brachial index to diagnose peripheral artery disease and assess cardiovascular risk
The authors seek to convince you to measure the ankle-brachial index in any patient you suspect may have peripheral artery disease, whether or not they have symptoms.
E.S.H. KIM, K. WATTANAKIT, AND H.L. GORNIK
