FROM THE EDITOR ................................................................. 595
The ‘T’ in ITP remains
The “I” has changed its meaning and the “P” is not necessary to make the diagnosis, but the disease formerly known as idiopathic thrombocytopenic purpura (ITP) remains important to diagnose.
B.F. MANDELL

THE CLINICAL PICTURE ............................................................. 600
A woman with a swollen uvula
A woman on patient-controlled analgesia with morphine suddenly develops shortness of breath because of uvular swelling obstructing the airway. What is the diagnosis?
S.A. PANDE, K. RAGHAV, S. MEHTA, G. BABBAR, AND S. KANDPAL

POINT AND COUNTERPOINT .................................................. 608
The apples and oranges of cost-effectiveness: A rejoinder
A recent CCJM commentary used straw men to indict cost-effectiveness research.
C.I. UDEH AND B.L. UDEH

The conundrum of cost-effectiveness
The author of the commentary replies.
V. PRASAD

THE CLINICAL PICTURE ............................................................. 616
Flashing lights, floaters, and reduced vision
A 62-year-old woman has numerous lobulated, yellowish, choroidal lesions in the left eye, and two similar but smaller lesions in the right eye. What is the cause?
A.H. ALRAIYES, M.C. ALRAIYES, F.A. ALMEIDA, AND A.D. SINGH

IM BOARD REVIEW ................................................................. 623
Fever, dyspnea, and hepatitis in an Iraq veteran
About 8 weeks after returning home, he presents with a cough, myalgia, headache, fever, chills, drenching night sweats, and dyspnea on exertion. What is the most likely diagnosis?
R.L. GUTIÉRREZ AND J.D. HARTZELL
