FROM THE EDITOR .................................................................
A weirder than weird story, and yet.... 73
Fecal microbiota transplantation is an evolving story that may seem weird but is worth following.
B.F. MANDELL

THE CLINICAL PICTURE ....................................................
Odynophagia, peripheral facial nerve paralysis, 76
mucocutaneous lesions
A 54-year-old woman presented with a 7-day history of odynophagia, pharyngeal swelling, and painful skin lesions on her ear. What does she have?
E. GRILLO, A. MIGUEL-MORRONDO, S. VAÑÓ-GALVÁN, AND P. JAÉN

EDITORIAL .................................................................
Functional anatomy of the facial nerve  78
revealed by Ramsay Hunt syndrome
Facial paralysis in association with a rash on the ear, tongue, or hard palate reflects geniculate zoster and requires immediate antiviral treatment.
D. GILDEN

THE CLINICAL PICTURE ....................................................
It’s all in the P wave 80
A 49-year-old man with rheumatic mitral valve stenosis presents with worsening exertional dyspnea, fatigue, and cough. What can his electrocardiogram tell us?
S. VENKATACHALAM AND C. RIMMERMAN

THE CLINICAL PICTURE ....................................................
Dermatitis in an intestinal transplant candidate 90
Cultures of biopsy specimens were negative. What is the cause of this patient’s lesions?
S. TAIMUR AND L. JOHNSON

MEDICAL GRAND ROUNDS ............................................
Resistant hypertension: 91
Diagnostic strategies and management
A 37-year-old woman was referred for help with managing difficult-to-control hypertension. Does she have resistant hypertension? How should her condition be managed?
E. BRAVO
