

TABLE OF CONTENTS

FROM THE EDITOR

Resistance of man and bug 202

Why individual clinicians make specific decisions usually can be sorted out. But our behavior as a group is more difficult to understand—and to alter.

B.F. MANDELL

THE CLINICAL PICTURE

Implications of a prominent R wave in V₁ 204

A 19-year-old woman presents with exertional dyspnea. What can her electrocardiogram tell us?

E.J. CHAN, V. NAGARAJAN, AND D.A. UNDERWOOD

MEDICAL GRAND ROUNDS

Detecting and controlling diabetic nephropathy: What do we know? 209

Diabetic kidney disease is on the rise. Strategies to prevent or control it are lowering blood pressure, controlling blood sugar, and inhibiting the renin-angiotensin-aldosterone system.

G. APPEL

THE CLINICAL PICTURE

A rapidly growing crusted nodule on the lip 222

The patient, who had a squamous cell carcinoma, underwent Mohs surgery and has done well.

P.J. WIRTH AND T.N. HELM

REVIEW

Carbapenem-resistant Enterobacteriaceae: A menace to our most vulnerable patients 225

This public health crisis demands redefined and refocused efforts in the diagnosis, treatment, and control of infections in hospitalized patients.

F. PEREZ AND D. VAN DUIN

CME CREDIT INTERPRETING KEY TRIALS 234

**Bone mineral density testing:
Is a T score enough to determine
the screening interval?**

Although a trial found that women with normal or only slightly low results need not come back for another 15 years, it may not be so simple.

K.B. DOSHI, L.Z. KHAN, S.E. WILLIAMS, AND A. A. LICATA

EDITORIAL 240

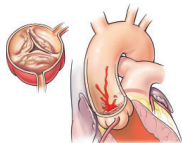

**What should be the interval
between bone density screenings?**

Doctors should not order unnecessary and expensive tests and should not recommend frequent repeated testing that does not benefit the patient.

S.M. OTT

CME CREDIT REVIEW 243

**Options for managing severe aortic stenosis:
A case-based review**

Today, patients who cannot undergo surgery can be offered a variety of less invasive treatments. We use seven cases to illustrate how to manage these patients.

O. AKSOY, B. O'BRIEN, AND V. MENON

EDITORIAL 253

**Aortic valve replacement:
Options, improvements, and costs**

How aortic valve disease is managed continues to evolve. Issues include outcomes and costs.

L.G. SVENSSON

DEPARTMENTS 203

Letters to the Editor

Readers comment on the short QT syndrome (January 2013).

CME Calendar 208

Directions for taking CME tests online 255

To receive CME credit, read any or all of the CME-certified articles in this issue (those that carry the CME logo), then go to www.ccm.org to take the test for the article or articles you select. It should take up to 1 hour to complete the activity for each article.

Release date: April 1, 2013

Expiration date: March 31, 2014

UPCOMING FEATURES

- Does coronary calcification scoring still have a role?
- Preserving fertility in female cancer patients
- Hereditary angioedema: Recognition is crucial
- Managing severe acute pancreatitis
- Aspirin's optimal use in heart disease
- Should all patients with portal vein thrombosis be anticoagulated?
- Biomarkers for assessing acute chest pain
- Treating addiction: Maintenance beats abstinence
