FROM THE EDITOR

A review of uncommon swelling provides useful reminders 261

Angioedema and the urticarias differ in their clinical manifestations and diagnostic and therapeutic implications.

B.F. MANDELL

THE CLINICAL PICTURE

Not all joint pain is arthritis 272

A 47-year-old man who was diagnosed with rheumatoid arthritis 5 years ago now has pleural effusions and abdominal pain.

G.S. KOCHHAR, M. RIZK, AND D.T. PATIL

CME CREDIT IM BOARD REVIEW

A young woman with enlarged lymph nodes 276

A previously healthy 25-year-old woman presents with a "lump in the neck." How should she be assessed?

H. HUSSEINZADEH, C.V. COTTA, S. GORDON, AND A. LICHTIN

THE CLINICAL PICTURE

Hyperpigmented patches on the neck, shoulder, and back 290

A 17-year-old boy has had asymptomatic, unilateral hyperpigmented patches since birth. What is the diagnosis?

J.M. RIZZO, L.C. LOSS, AND I.L. ROTHMAN

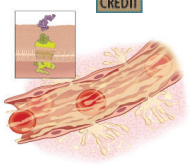
CME CREDIT REVIEW



Recognizing and managing hereditary angioedema 297

Recognizing this rare but life-threatening disease is crucial, especially now that drugs are available to prevent and treat acute attacks.

K. TSE AND B.L. ZURAW

CME CREDIT REVIEW

Preserving fertility in female cancer patients: A snapshot of the options 309

With the odds of surviving cancer improving, many young women facing therapy may first wish to take steps to ensure that they will still be able to bear children afterward.

I. SOAVE, G. LO MONTE, E. GIUGLIANO, A. GRAZIANO, AND R. MARCI

CME CREDIT REVIEW

Aspirin: Its risks, benefits, and optimal use in preventing cardiovascular events 318

Aspirin's benefits in primary prevention are not as clear as in secondary prevention, particularly in people with diabetes, in women, and in the elderly.

K. PARK AND A.A. BAVRY
