TABLE OF CONTENTS

FROM THE EDITOR
A review of uncommon swelling provides useful reminders
Angioedema and the urticarias differ in their clinical manifestations and diagnostic and therapeutic implications.
B.F. Mandell

THE CLINICAL PICTURE
Not all joint pain is arthritis
A 47-year-old man who was diagnosed with rheumatoid arthritis 5 years ago now has pleural effusions and abdominal pain.
G.S. Kochhar, M. Rizk, and D.T. Patil

IM BOARD REVIEW
A young woman with enlarged lymph nodes
A previously healthy 25-year-old woman presents with a “lump in the neck.” How should she be assessed?
H. Husseinzadeh, C.V. Cotta, S. Gordon, and A. Lichtin

THE CLINICAL PICTURE
Hyperpigmented patches on the neck, shoulder, and back
A 17-year-old boy has had asymptomatic, unilateral hyperpigmented patches since birth. What is the diagnosis?
J.M. Rizzo, L.C. Loss, and I.L. Rothman

REVIEW

Recognizing and managing hereditary angioedema
Recognizing this rare but life-threatening disease is crucial, especially now that drugs are available to prevent and treat acute attacks.

K. TSE AND B.L. ZURAW

REVIEW

Preserving fertility in female cancer patients: A snapshot of the options
With the odds of surviving cancer improving, many young women facing therapy may first wish to take steps to ensure that they will still be able to bear children afterward.

I. SOAVE, G. LO MONTE, E. GIUGLIANO, A. GRAZIANO, AND R. MARCI

REVIEW

Aspirin: Its risks, benefits, and optimal use in preventing cardiovascular events
Aspirin’s benefits in primary prevention are not as clear as in secondary prevention, particularly in people with diabetes, in women, and in the elderly.

K. PARK AND A.A. BAVRY

DEPARTMENTS

CME Calendar

Directions for taking CME tests online
To receive CME credit, read any or all of the CME-certified articles in this issue (those that carry the CME logo), then go to www.ccjm.org to take the test for the article or articles you select. It should take up to 1 hour to complete the activity for each article.
Release date: May 1, 2013
Expiration date: April 30, 2014

UPCOMING FEATURES

- Calcium supplements and the guidelines: What do we tell patients?
- Incidental ovarian cysts: When to reassure, reassess, refer
- Does coronary calcification scoring still have a role?
- Managing severe acute pancreatitis
- What is the preferred revascularization strategy for patients with diabetes?
- Should all patients with portal vein thrombosis be anticoagulated?
- Is pharmacogenetic testing needed when prescribing warfarin?
