## From the Editor

**Guidelines or a plea for help?**

The US Preventive Services Task Force (USPSTF) recently published a guideline on the use of calcium and vitamin D supplements to prevent fractures in adults. I agree with two-thirds of their recommendations.

* B.F. Mandell

## Commentary

**Should healthy people take calcium and vitamin D to prevent fractures?**

The USPSTF recently threw cold water on the use of these supplements, but the findings need to be put in context.

* R.K. Dore

## Review

**Medication-assisted treatment of opiate dependence is gaining favor**

Recovering addicts are more likely to avoid returning to the use of opiates if they participate in a program that includes taking maintenance doses of methadone or buprenorphine.

* J.M. Jerry and G.B. Collins

## Medical Grand Rounds

**Managing severe acute pancreatitis**

Progress in managing this disease has been disappointing, but clinicians are learning to recognize it and treat it supportively better than in the past.

* T. Baron

## The Clinical Picture

**Stiff, numb hands**

A 45-year-old woman presents to the emergency room with cramps and paresthesias in her hands and feet. What is going on?

* K. Shaheen and S. Merugu
