

# TABLE OF CONTENTS

**FROM THE EDITOR**.....

**The pipe and the plug:  
Is unblocking arteries enough?** **473**

We all should be more aggressive in using treatments that reduce the progression of coronary artery disease—particularly in patients with diabetes.

B.F. MANDELL

**PERSONALIZING PATIENT CARE**.....

**Clinical applications of pharmacogenetics:  
Present and near future** **477**

Pharmacogenetics promises to give clinicians the tools to make treatment decisions based on genetic testing.

P.A. GLADDING

**PERSONALIZING PATIENT CARE**.....

**Should we use pharmacogenetic testing  
when prescribing warfarin?** **483**

There is evidence in favor of testing, but not yet enough to strongly recommend it.

M. ROUSE, C. CRISTIANI, AND K.A. TENG

**IM BOARD REVIEW**.....

**A 51-year-old woman with dyspnea** **487**

Her symptoms began 4 days ago. She appears uncomfortable and anxious, her pulse is over 160, and her respirations are 40. What is going on?

J.J. LIANG, A.D. GOLDBERG, AND B. AFESSA

**THE CLINICAL PICTURE**.....

**Lung air-fluid level in a smoker** **500**

A 49-year-old man with a 25-pack-year history had a striking finding on radiography.

F. KHEIR, A.H. ALRAIYES, D. SALERNO, AND M.C. ALRAIES

## Online Features

### Free e-mail alerts

To receive your free e-mail Table of Contents (eTOC) when a new issue of the *Cleveland Clinic Journal of Medicine* is released, just click on "Alerts" from any page at [www.ccm.org](http://www.ccm.org).

It is quick and easy. All you need is your e-mail address. No other registration information is required.

### Social Networking

To post a *CCJM* article to Facebook or your favorite social networking site, just click on the icon at the bottom of any online article.

CONTINUED FROM PAGE 468

**CME CREDIT REVIEW** ..... 503

**Incidental ovarian cysts:  
When to reassure, when to reassess,  
when to refer**

Most cysts are benign, but a few are malignant, with a notoriously poor survival rate. How can we tell if a patient truly needs surgery?

E.K. ROSS AND M. KEBRIA

**CME CREDIT INTERPRETING KEY TRIALS** ..... 515

**The FREEDOM trial:  
In appropriate patients with diabetes  
and multivessel coronary artery disease,  
CABG beats PCI**

A large randomized trial finds bypass grafting superior to percutaneous intervention in a highly selected population.

B. AGGARWAL, S.S. GOEL, J.F. SABIK, AND M.H. SHISHEHBOR

**DEPARTMENTS** ..... 476

**CME Calendar** ..... 476

**Corrections** ..... 482

Errors appeared in Batur P. Emergency contraception: Separating fact from fiction. *Cleve Clin J Med* 2012; 79:771–776; and in Baron T. Managing severe acute pancreatitis. *Cleve Clin J Med* 2013; 80:354–359.

**Directions for taking CME tests online** ..... 524

To receive CME credit, read any or all of the CME-certified articles in this issue (those that carry the CME logo), then go to [www.cjim.org](http://www.cjim.org) to take the test for the article or articles you select. It should take up to 1 hour to complete the activity for each article.

Release date: August 1, 2013

Expiration date: July 31, 2014

# UPCOMING FEATURES

- **Cardiovascular disease in women:  
How is it different?**
- **Transient ischemic attack:  
Omen and opportunity**
- **Are we overdiagnosing pneumonia?**
- **Should all patients with portal vein thrombosis be anticoagulated?**
- **Biomarkers in acute coronary syndromes:  
Uses, limitations, and future**
- **Azithromycin and the risk of sudden cardiac death**
