Table of Contents

From the Editor ................................................................. 473
The pipe and the plug: Is unblocking arteries enough?
We all should be more aggressive in using treatments that reduce the progression of coronary artery disease—particularly in patients with diabetes.
B.F. Mandell

Personalizing Patient Care ...................................................... 477
Clinical applications of pharmacogenetics: Present and near future
Pharmacogenetics promises to give clinicians the tools to make treatment decisions based on genetic testing.
P.A. Gladding

Personalizing Patient Care ...................................................... 483
Should we use pharmacogenetic testing when prescribing warfarin?
There is evidence in favor of testing, but not yet enough to strongly recommend it.
M. Rouse, C. Cristiani, and K.A. Teng

IM Board Review ................................................................. 487
A 51-year-old woman with dyspnea
Her symptoms began 4 days ago. She appears uncomfortable and anxious, her pulse is over 160, and her respirations are 40. What is going on?
J.J. Liang, A.D. Goldberg, and B. Afessa

The Clinical Picture ............................................................. 500
Lung air-fluid level in a smoker
A 49-year-old man with a 25-pack-year history had a striking finding on radiography.
F. Kheir, A.H. Alraies, D. Salerno, and M.C. Alraies

INCIDENTAL OVARIAN CYSTS: 503
When to reassure, when to reassess, when to refer
Most cysts are benign, but a few are malignant, with a notoriously poor survival rate. How can we tell if a patient truly needs surgery?
E.K. ROSS AND M. KEBRIA

THE FREEDOM TRIAL: 515
In appropriate patients with diabetes and multivessel coronary artery disease, CABG beats PCI
A large randomized trial finds bypass grafting superior to percutaneous intervention in a highly selected population.
B. AGGARWAL, S.S. GOEL, J.F. SABIK, AND M.H. SHISHEHBOUR
