FROM THE EDITOR ............................................................................
It is not a ‘mini'-stroke, it is a call to action 538
Although patients may call transient ischemic attacks “mini-strokes,” there is nothing mini about their significance.
B.F. MANDELL

COMMENTARY ..................................................................................
Azithromycin and risk of sudden cardiac death: 539
Guilty as charged or falsely accused?
We need not abandon this drug, but we should see if our patients have risk factors, and take precautions.
J.R. GIUDICELLI AND M.J. ACKERMAN

1-MINUTE CONSULT ..........................................................................
Which lower-extremity DVTs should be removed early? 546
This controversial therapy is best considered in cases of proximal deep vein thrombosis in younger patients.
S.K. SHAH AND D.G. CLAIR

THE CLINICAL PICTURE ......................................................................
Chronic itch on the upper back, with pain 550
An otherwise healthy man has had itchy, grayish-brown patches on his back for 2 years, characteristic of notalgia paresthetica.
S. VAÑO-GALVÁN, E. GRILLO, M. TRUCHUELO, AND P. JAÉN

THE CLINICAL PICTURE ......................................................................
Fever, dyspnea, and a new heart murmur 559
In cases of recurrent persistent fever and a new heart murmur, infective endocarditis must always be considered.
G. JACKSON, C. CAMARGO, L.F. LING, V. KALAHASTI, AND C.M. RIMMERMAN
