FROM THE EDITOR

Ebola—lessons still to be learned 708

So far, the disease has barely touched our country, but it has had a big impact on our health care system and our national psyche.

B.F. MANDELL

THE CLINICAL PICTURE

Sarcoidal infiltration of tattoos 717

Corticosteroid treatment resulted in clinical improvement after 3 months.

L. MIGUEL-GÓMEZ, S. VAÑÓ-GALVÁN, B. SIDO-AHMED, C. MORENO GARCÍA DEL REAL, AND P. JAÉN-OLASOLO

SMART TESTING

When does an adult with headaches need central nervous system imaging? 719

Without red-flag symptoms, central nervous system imaging is unwarranted and may be harmful.

J. POST AND C. MORIATES

1-MINUTE CONSULT

Is antibiotic treatment indicated in a patient with a positive urine culture but no symptoms? 721

Some groups should be screened and treated, eg, pregnant women and patients undergoing an invasive urologic procedure.

M.T. HECKER AND C.J. DONSKEY

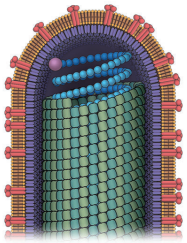
IM BOARD REVIEW

A 41-year-old man with abdominal pain 725

His symptoms and imaging findings suggested an infarction in the spleen, but what caused the infarction?

H. REHMAN

CME CREDIT MEDICAL GRAND ROUNDS



Ebola virus: Questions, answers, and more questions 729

The clinical virology of Ebola virus, the reported proposed treatments, and an overview of the current outbreak.

K.D. BRIZENDINE

REVIEW

Identifying statin-associated autoimmune necrotizing myopathy 736

Unlike simple myalgia or myositis, this condition can persist or even arise de novo after the statin is stopped.

J. ALBAYDA AND L. CHRISTOPHER-STINE

REVIEW

Updated guidelines on cardiovascular evaluation before noncardiac surgery: A view from the trenches 742

The purpose is not to get clearance for surgery but to evaluate the patient's medical status and risk of complications.

S.L. COHN

EDITORIAL

Perioperative medicine: Combining the science and the art 752

Although we may wish for "cookbook" guidelines, often we must practice the "art" of medicine.

P.J. GRANT

REVIEW

Syncope: Etiology and diagnostic approach 755

There are three major types: neurally mediated, orthostatic, and cardiac. The goal is to rule out structural heart disease.

E.B. HANNA

PATIENT EDUCATION

Tilt-table testing 767

DEPARTMENTS

CME Calendar 709

Letters to the Editor 714

A reader comments on the risk of cancer with diabetes drugs (October 2014).

Directions for CME 768

To receive CME credit, read any or all of the CME-certified articles in this issue (those that carry the CME logo), then go to www.ccjm.org to take the test for the article or articles you select. It should take up to 1 hour to complete the activity for each article.
Release date: December 1, 2014
Expiration date: November 30, 2015
