NEW SERIES: SMART TESTING

DOING THE RIGHT THING TO CONTROL HEALTH CARE COSTS

Is cardiac stress testing appropriate in asymptomatic adults at low risk?

This test is most useful in patients who have chest pain and shortness of breath on exertion.

C.D. Smith and P.C. Alguire

THE CLINICAL PICTURE

Double trouble: Simultaneous complications of therapeutic thoracentesis

A 51-year-old man with liver disease developed both pneumothorax and pulmonary edema.

B. Apter and P. Aronowitz

COMMENTARY

Changes to practice may help avoid ‘double trouble’

When draining large effusions, take precautions to prevent pneumothorax and reexpansion pulmonary edema.

E. Mireles-Cabodevilla and R.W. Ashton

IM BOARD REVIEW

Swelling and pain 2 weeks after a dog bite

At first the bite seemed to improve, but now it is worsening, with red streaks from wrist to elbow.

M.A. Lane and T.H. Taylor

**Patent foramen ovale and cryptogenic stroke: Many unanswered questions**

If a stroke has no obvious cause, should you look for a patent foramen ovale? And what should you do if you find one?

C. ROTH and O. ALLI

**Patient foramen ovale and the risk of cryptogenic stroke**

There is no longer any doubt that patent foramen ovale can be the culprit in stroke, and closure is safe and effective.
