Selected presentations from Sones/Favaloro Scientific Program

Transforming the delivery of cardiovascular care: Research and innovation in the Heart & Vascular Institute

Supplement Editor
Umesh Khot, MD
Heart & Vascular Institute
Cleveland Clinic

Table of Contents

e1 Results of the GLAGOV trial
STEVEN E. NISSEN AND STEPHEN J. NICHOLLS

e6 Trends in cardiovascular risk profiles
SAMIR KAPADIA

e10 Expanding indications for TAVR: The preferred procedure in intermediate-risk patients?
DAVID L. BROWN

e15 CABG: A continuing evolution
FAISAL BAKAEEN

e20 A new generation of drug-eluting stents: Indications and outcomes of bioresorbable vascular scaffolds
RON WAKSMAN

e25 Improving the safety and efficacy of robotically assisted mitral valve surgery
STEPHANIE MICK

e28 Aortic replacement in cardiac surgery
ERIC E. ROSELLI

Cover art: Cleveland Clinic cardiologist F. Mason Sones, MD, who in 1958 launched the modern era of heart disease diagnosis using coronary angiography (left) and Rene Favaloro, MD, who in 1967 conducted the first documented successful coronary artery bypass surgery using a saphenous vein (right).
